CEO's Statement

Prasheem Seebran

Chief Executive Officer and Managing Director,
MCIS Insurance Berhad

Dear Valued Policyholders,

On behalf of MCIS Life, I wish to express my heartfelt gratitude to all of you for your unwavering support and trust in us.

We marked the closure of our financial year ending 31 December 2022 witnessing an intense 12-month period filled with growth, resilience, and transformation in specific reference to the overall performance of our wide-ranging investment-linked funds.

Collectively as with the rest of the market, in 2022 we faced numerous challenges including global economic uncertainties, but our exceptional investment team and fund managers leveraged upon robust strategies which propelled us to achieve better than average market performance.

CEO's Statement (cont'd.)

For the period under review, I am happy to share that despite market headwinds, we were steadfast in delivering upon our long-standing commitment focusing on superior value and consistent returns to all our policyholders as MCIS Life placed greater importance on innovation and embracing Environmental, Social and Governance (ESG) principles.

As a trusted life insurer with over six decades of market experience, we view sustainable and responsible investing as a key driver for long-term value creation, going beyond the norm of treating ESG as an ethical business requirement.

To assist you with a better, quick grasp of how key economic sectors and performance indicators shaped the market in 2022 thus influencing our fund performance, please continue reading the brief commentary below:

Market Performance Highlights

In perspective, 2022 was a challenging year for the global economy with some macroeconomic headwinds such as high inflation rates, tightened monetary policies, Russia-Ukraine war and global supply chain crisis which led to global growth slowing down to the extent of the global economy nearly falling into recession.

The United States (U.S.), the Euro area, and China are all undergoing a period of pronounced weakness, and the resulting spillovers are exacerbating other headwinds faced by emerging markets and developing economies.

In the U.S., inflation surged to a 40-year high of 9.06% in June 2022 which led the Federal Reserve to initiate an unprecedented series of interest-rate hikes from the target rate range of 0% - 0.25% to 4.25% - 4.50% by end-December 2022. This marked the highest rate in 15 years and the economy is losing momentum. Despite this however, the unemployment rate improved to 3.60% as of December 2022 as compared to 4.20% in December 2021.

The U.S. dollar strengthened against nearly every other major currency to levels not seen in decades as the Federal Reserve aggressively hiked interest rates in a bid to combat inflation and on the whole, the broader dollar index, used to measure the value of the dollar against a basket of currencies widely used in international trade, appreciated by over 12.00% in 2022.

CEO's Statement (cont'd.)

The Eurozone economies and the United Kingdom have been hindered by higher energy prices and energy shortages due to the Russia-Ukraine war, resulting in slumps in consumer confidence and spending. In addition, inflation rose sharply across Europe and caused central banks to adopt a more hawkish policy position. Key policy rates of the European Central Bank and the Bank of England began the year at -0.50% and +0.25% respectively and by the end of the year, it rose to 2.00% and 3.50% respectively with both set to move higher in the months ahead even amidst recession risks.

While growth was particularly weak in China in 2022, it slumped to one of its worst levels in nearly half a century as the fourth quarter was hit hard by strict COVID-19 curbs and a property market slump which raised the pressure on policymakers to unveil more stimulus packages this year.

For the year 2022, China's GDP expanded 3.00%, badly missing the official target of "around 5.50%" and breaking away sharply from the 8.40% growth in 2021. Excluding the 2.20% expansion after the initial pandemic hit in 2020, this is the worst showing since 1976, the final year of the decade-long Cultural Revolution that wrecked China's economy.

After Russia's brutal invasion of Ukraine sent global commodity prices soaring early in 2022, energy prices declined in the second half of the year and it further eased the supply constraints, combined with lower consumer demand. This allowed inflation to simmer across core goods categories and crude oil for Brent price increased 10.45% at the end of December 2022 to USD85.91/barrel.

At the home front, the Malaysian economic performance boosted to 8.70% as compared to 3.10% in the year 2021, the highest annual growth recorded within the period of 22 years (2000: 8.90%). Our export value, meanwhile, rose 25.00% year-on-year (y-o-y) to a record RM1.55 trillion in 2022 on the back of increased shipments to all major trading partners while headline inflation increased to 3.30% (2021: 2.50%) and core inflation averaged higher at 3.00% (2021: 0.70%).

Moving forward, the World Bank has projected global economy growth to decelerate sharply by 1.70% in 2023 to its third weakest pace in nearly three decades, overshadowed only by the 2009 and 2020 global recessions. This reflects policy tightening aimed at containing very high inflation, worsening financial conditions, and continued disruptions from the on-going Russia-Ukraine war.

CEO's Statement (cont'd.)

For Malaysia in 2023, the World Bank expects the economic growth to expand at a more moderate pace of 4.00% amid a challenging external environment. Domestic demand will continue to drive growth, supported by continued recovery in the labour market and realisation of multi-year investment projects. The services and manufacturing sectors will also continue to support growth while the slowdown in exports following weaker global demands would be partially cushioned by higher tourism activities. The balance of risks remains tilted to the downside, mainly from weaker global growth, tighter financial conditions, re-escalation of geopolitical conflicts and worsening supply chain disruptions.

Financial Market Performance

The inflation impact and interest rate hikes in most countries sent stocks into a bear market and cratering the bond market in the year 2022. Investors witnessed one of the most turbulent years with trillions of dollars wiped-off world stocks, bond market tantrums and whip-sawing currency and commodities.

In the US, the S&P 500 Index generated a negative return of 19.44% y-o-y and the Dow Jones Industrial index weakened by 8.78% y-o-y, the worst since 2008 and snapped a three-year win streak. Sticky inflation and aggressive rate hikes from the Federal Reserve battered growth and technology stocks and weighed on investor sentiments throughout the year. Geopolitical tensions and volatile economic data also kept markets on the edge.

It was also the same momentum in Europe with the pan-European Stoxx 600 Index – which includes around 90% of the European market capitalisation in 17 countries - closed the last trading day of 2022 by recording a 12.76% decline, which makes this the worst performance since the 13.24% annual decline in 2018. The European's largest market, Germany's DAX Index, ended the year lower by 12.35% y-o-y while France's CAC 40 Index lost 9.50% y-o-y.

Our local market, along with other Asian bourses, except for Singapore's Straits Times Index (STI), ended the year in negative territory as the FBMKLCI Index lost 4.60% y-o-y to 1,495.49 points compared with the STI's gain of 4.09%. Bursa's lower trading volumes and values underscored reduced retail interest as investors may have opted out of the market following the sharp correction in the share price of glove makers and technology companies. For 2022, local retail and foreign investors were the net buyers with a total net buy of RM2 billion and RM4.4 billion respectively and local institutions became net sellers at RM6.4 billion.

CEO's Statement (cont'd.)

For the fixed income category, 2022 was a volatile market as well when Bank Negara Malaysia (BNM) hiked the Overnight Policy Rate from 1.75% to 2.75% or 100bps in the year under review. The Malaysian Government Securities (MGS) had not performed well in overall, with the yields moving upward by an average ~51bps across the curve as this mainly reflected the hawkish monetary policies across major world economies in an attempt to contain inflationary pressures. The MGS 10-year yield soared to a 14-year high to 4.57% and eased back to 4.04% towards end of the year while the Markit iBoxx ALBI Malaysia Total Return Index stood at 1.21% in the same period.

MCIS Life's Fund Performance Overview

For the twelve-months period ending 31 December 2022, Dividend Fund gained 0.11% while Equity Fund gained 1.09% with both returns outperforming the FBMKLCI Index which posted a loss of 4.60%. On a more positive note, although Jati Fund posted a negative return of 1.61% it managed to outperform the benchmark FBM EMAS Shariah Index by 919bps, which posted wider loss of 10.80%. These three local based asset funds managed to outperform the benchmark for the three-year and five-year periods under review with the outperformance mainly due to low exposure to underperforming stocks.

As noted earlier, in 2022 the MGS did not perform well on the overall with the yields moving upward by an average ~51bps across the curve. During this period, Income Fund gave a return of 0.60% as compared to its benchmark return of 1.21% while Balanced Fund posted 0.61% return as compared to its benchmark return of -1.51% on y-o-y basis.

The Asiapac Fund, investing in the Principal S&P Ethical Asia Pacific Dividend ETF listed in Singapore, recorded a negative return of 3.79%, outperforming the benchmark return which recorded a wider loss of 13.42%. The outperformance was due to better accomplishment of the underlying asset and cash holdings in the portfolio in addition to outperforming the benchmark index for the three-year and five-year periods by 671bps and 549bps respectively.

Moving to the Global Yakin Fund, a feeder fund investing in abrdn Islamic World Equity Fund (formerly known as Aberdeen Standard Islamic World Equity Fund), gave a return of -18.51%, underperforming the benchmark MSCI AC World Islamic Index which posted a return of -15.32%. However, the fund managed to outperform the benchmark index for the three-year and five-year period by 138bps and 75bps respectively.

CEO's Statement (cont'd.)

Titan Fund which invests in the MyETF Dow Jones U.S. Titans 50, registered a negative return of 17.08% y-o-y for the period ending 31 December 2022, outperforming the benchmark index, Dow Jones Islamic Market U.S. Titans 50 Index, which registered a wider negative return of 26.95% y-o-y. The fund also managed to outperform the benchmark for the three-years period by 63bps.

Outlook for 2023

As we step into 2023 which is widely seen as a year where the global economy is expected to slow down, our research and development team would diligently work to identify new opportunities alongside our investment management which would focus on strategically navigating market fluctuations to optimise returns.

This year, the U.S. Federal Reserve is expected to continue raising its fund rate in the first half of 2023 to fight against inflation but over the longer term, we expect recovery trends from the second half of year onwards when inflation begins to inch lower. Historical analysis suggests that lower interest rates due to lower inflation would be positive for the equity market.

For the local fixed income segment, BNM is expected to maintain its monetary stance to being slightly hawkish in 2023 as the country operates in the endemic phase. External risk factors such as the Russia-Ukraine conflict, U.S.-China tensions and the fluctuation in crude oil prices will continue to weigh on the local market.

In our view, the corporate bond space still provides attractive yields and in line with this potential, we would keep looking to buy on dips of corporate bonds based on opportunities as we remain optimistic about the growth prospects for our investment-linked funds and MCIS Life looks forward to sharing greater success in the years to come with each of you.

Sincerely,

Prasheem Seebraan

Chief Executive Officer

Fund Objectives

Balanced Fund

is a diversified portfolio consisting of equities, fixed income and money market instruments in various ratios with the objective of striving to provide the best returns and at the same time safeguarding against any negative development in the area of investment. It aims to have a balance between capital and income growth and appeals to conservative investors. While the focus will be on both equity and fixed income, the ratios of each at any point of time would be dependent upon prevailing market and economic conditions.

Equity Fund

focuses more on investment in equity to attain medium to long term capital appreciation. Besides equities, this fund would also invest in money market instruments with the actual allocation to be based on prevailing market and economic conditions and technical factors. This is more for aggressive investors.

Income Fund

focuses on the objective of providing income distribution on a regular basis while at the same time preserving capital - basically to cater for risk adverse investors. While the fund would be biased towards fixed income instruments it may also invest in money market instruments. Decisions on asset allocations and ratios will depend on the fund manager's views of the local as well as global macroeconomic conditions.

Jati Fund

invests in Shariah-compliant equities and money market instruments in various ratios depending on market and economic conditions prevalent at that point of time. This fund's objective is to invest in companies that provide good prospects for capital appreciation over the medium to long term. However, the fund is not a Shariah-compliant product.

Fund Objectives (cont'd.)

Dividend Fund

Asiapac Fund

(formerly known as Aberdeen Standard Islamic Investments (Malaysia) Sdn Bhd.) However, the fund is not a Shariah-compliant product.

Titan Fund

invests in MyETF Dow Jones U.S. Titans 50 which aims for capital growth over medium to long term period by investing in international portfolio of Shariah-compliant equities, which are listed in the U.S. market. The investment results will closely correspond to the performance of the Dow Jones Islamic Market U.S. Titans 50 Index. The fund is not a Shariah-compliant product.

Fund Performance Report

Balanced Fund

For twelve-month period, Balanced Fund has outperformed its required benchmark by 212bps when the fund generated an annual return of 0.61% as compared to its benchmark return of -1.51% on year-on-year basis (eg. an index constructed with 50% weighting to the FBMKLCI and 50% to the Markit iBoxx ALBI Malaysia TR Index).

The Malaysian stock market has performed negatively in-line with dampened global market sentiment due to macroeconomic headwinds. The FBMKLCI Index closed the year of 2022 at 1,495.49 points, lower by -4.60% on yearly basis. On fixed income space, MGS has not performed well in overall, with the yields moving upward by average ~51bps across the curve. This was mainly reflecting the hawkish monetary policy across the major world economies in an attempt to contain the inflationary pressure.

Moving forward, we expect global economy to slow down into the year 2023, after showing strong recovery in 2022. U.S. Federal Reserve is expected to raise its fund rate in the first half of 2023 to fight against inflation. However, for longer term, we expect there will be recovery in the second half of year when the inflation started to inch lower. Historical analysis is suggesting that lower interest rates due to lower inflation will be positive for the equity market. For fixed income, BNM is expected to maintain monetary stance to slight hawkish in 2023 when the country has been entering into endemic phase. The external risk factors and the fluctuation in crude oil prices will continue to weigh on the local market, but we believe the corporate bond space still provides attractive yields.

Fund Performance Report (cont'd.)

Equity Fund

Equity Fund gained 1.09% for the year ending 31 December 2022. The return had outperformed the benchmark return for yearly basis by 569bps, which FBMKLCI Index lost by 4.60%. On the longer term, the fund had also outperformed the benchmark for the period of three-year and five-year periods with excess of 257bps and 329bps respectively. The outperformance was mainly due to low exposure of underperforming stocks.

The Malaysian stock market has performed negatively in-line with dampened global market sentiment due to macroeconomic headwinds. Moving forward, we expect global economy to slow down into the year 2023. U.S. Federal Reserve is expected to raise its fund rate in the first half of 2023 to fight against inflation. However, for longer term, we expect there will be recovery in the second half of year when the inflation started to inch lower. Historical analysis is suggesting that lower interest rates due to lower inflation will be positive for the equity market.

Moving forward, investment strategy will remain centered on well-managed liquid stocks with positive growth prospects with strong earnings visibility. Stocks with strong cash flows and proactive capital management will also be considered.

Jati Fund

Jati Fund has posted a negative return of 1.61% for the year ending 31 December 2022. However, it has managed to outperform the benchmark FBM EMAS Shariah Index by 919bps, which posted wider loss of 10.80% for the same period under review. On the longer term, the fund had also outperformed the benchmark for the period of three-year and five-year periods with excess of 293bps and 331bps respectively. The outperformance was mainly due to low exposure of underperforming stocks.

The Malaysian stock market has performed negatively in-line with dampened global market sentiment due to macroeconomic headwinds. Moving forward, we expect global economy to slow down into the year 2023, after showing strong recovery in 2022. U.S. Federal Reserve is expected to raise its fund rate in the first half of 2023 to fight against inflation. However, for longer term, we expect there will be recovery in the second half of year when the inflation started to inch lower. Historical analysis is suggesting that lower interest rates due to lower inflation will be positive for the equity market.

Jati Fund invests in Shariah approved securities listed on the Bursa Malaysia with a strategy to ensure sustainable long-term growth for the fund. Investment strategy will remain centered on well-managed liquid stocks that exhibit positive growth prospects with strong earnings visibility. Stocks with strong firm fundamental, defensive and strong cash flows will also be considered.

Income Fund

For twelve-month period ended 31 December 2022, Income Fund had underperformed its required benchmark by -61bps when the fund generated an annual return of 0.60% as compared to its benchmark return of 1.21% on year-on-year basis.

In 2022, MGS has not performed well in overall, with the yields moving upward by average ~51bps across the curve. This was mainly reflecting the hawkish monetary policy across the major world economies in an attempt to contain the inflationary pressure.

Going forward, BNM is expected to maintain monetary stance to slight hawkish in 2023 when the country has been entering into endemic phase. The external risk factors such as the Russia-Ukraine conflict, U.S.-China tension and the fluctuation in crude oil prices will continue to weigh on the local market, but we believe the corporate bond space still provides attractive yields. As such, we will keep looking to buy on dips of corporate bonds if the opportunity arises.

Asiapac Fund

Asiapac Fund, a feeder fund that invests in Principal S&P Ethical Asia Pacific Dividend ETF listed in Singapore, aims to provide investment results that closely correspond to the performance of the benchmark index, S&P Ethical Pan Asia Select Dividend Opportunities Index.

For twelve-months period ending 31st December 2022, the fund recorded a negative return of 3.79%, outperformed the benchmark return which recorded a wider loss of 13.42%. The outperformance was due to better performance of the underlying asset and cash holdings in the portfolio. The fund also managed to outperform the benchmark index for three-year and five-year periods by 671bps and 549bps respectively.

2022 was a relatively negative year for equity market globally including Asia Pacific. During the year, Chinese stocks were not performing well as COVID-19 lockdowns hit its economy through the year. However, investors are hopeful that recessions are likely to hit in early 2023, thus, the global economic landscape should be much improved towards the end of 2023.

Titan Fund

Titan Fund invests in MyETF Dow Jones U.S. Titans 50 which aims for capital growth over medium to long term period by investing in international portfolio of Shariah-compliant equities, which is listed in the U.S. market. The investment results will closely correspond to the performance of the Dow Jones Islamic Market U.S. Titans 50 Index.

The fund registered a negative return of 17.08% y-o-y for the period ended 31st December 2022, outperforming the benchmark index, Dow Jones Islamic Market U.S. Titans 50 Index which registered wider negative return of 26.95% y-o-y on the same period under review. The fund also managed to outperform the benchmark for three-year period by 63bps.

2022 was a relatively negative year for equity market globally due to concerns over macroeconomic headwinds. During the year, the U.S. was among the worst performing market in the region, dragged by technology stocks and other mega-capital companies. However, investors are hopeful that recessions are likely to hit in early 2023, thus, the global economic landscape should be much improved towards the end of 2023.

Report on the audit of the financial information

Opinion

We have audited the financial information of Balanced Fund, Equity Fund, Income Fund, Jati Fund, Dividend Fund, AsiaPac Fund, Global Yakin Fund and Titan Fund (collectively referred to as "the Funds"), which comprise the statements of assets and liabilities as at 31 December 2022, and the statements of income and expenditure, statements of changes in net asset value of the Funds for the year then ended, and notes to the financial information, including a summary of significant accounting policies, as set out on pages 58 to 105.

In our opinion, the accompanying financial information of the Funds for the year ended 31 December 2022 are prepared, in all material respects, in accordance with the accounting policies as described in Note 3 to the financial information and the Policy Document on Investment-linked Business issued by Bank Negara Malaysia.

Basis for opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the financial information section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter

We draw attention to Note 2 to the financial information of the Funds, which describes the basis of accounting. The financial information of the Funds are prepared to assist the Funds in complying with the Policy Document on Investment-linked Business issued by Bank Negara Malaysia. As a result, the financial information of the Funds may not be suitable for another purpose. Our report is intended solely for the unitholders of the Funds, as a body and should not be distributed to or used by parties other than the unitholders of the Funds. Our opinion is not modified in respect of this matter.

Independent auditors' report (cont'd.)
to the unitholders of the Investment-Linked Funds of
MCIS Insurance Berhad

Independence and other ethical responsibilities

We are independent of the Funds in accordance with the By-Laws (on Professional Ethics, Conduct and Practice) of the Malaysian Institute of Accountants ("By-Laws") and the International Code of Ethics for Professional Accountants (including International Independence Standards) ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Information other than the financial information and auditors' report thereon

The directors of the Manager ("the directors") are responsible for the other information. The other information comprises the information contained in the Annual Report of the Funds, but does not include the financial information of the Funds and our auditors' report thereon.

Our opinion on the financial information of the Funds does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial information of the Funds, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial information of the Funds or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial information

The directors are responsible for the preparation of financial information of the Funds in accordance with the accounting policies as described in Note 3 to the financial information and the Policy Document on Investment-linked Business issued by Bank Negara Malaysia. The directors are also responsible for such internal control as the directors determine is necessary to enable the preparation of financial information of the Funds that are free from material misstatement, whether due to fraud or error.

Independent auditors' report (cont'd.)
to the unitholders of the Investment-Linked Funds of
MCIS Insurance Berhad

Responsibilities of the directors for the financial information (cont'd.)

In preparing the financial information of the Funds, the directors are responsible for assessing the Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Funds or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial information

Our objectives are to obtain reasonable assurance about whether the financial information of the Funds as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial information.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial information of the Funds, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control.

Independent auditors' report (cont'd.)
to the unitholders of the Investment-Linked Funds of
MCIS Insurance Berhad

Auditors' responsibilities for the audit of the financial information (cont'd.)

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial information of the Funds or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other matters

This report is made solely to the unitholders and for no other purpose. We do not assume responsibility to any other person for the content of this report.

3. Summary of significant accounting policies

(a) Investments

i) Financial Assets

On initial recognition, a financial asset is classified as measured at amortised cost or fair value through profit or loss (“FVTPL”).

Amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Funds have designated all its deposits with financial institutions and short term receivables, which meet the above condition as Amortised cost.

FVTPL

All financial assets that are not classified as measured at amortised cost, as described above, are measured at FVTPL. Any gains or losses from changes in fair value and interest are recognised in the statement of income and expenditure.

The Funds determine the classification of its financial assets at initial recognition, and the categories include financial assets at FVTPL and at amortised cost.

Notes to the Financial Information (cont'd.)

3. Summary of significant accounting policies (cont'd.)

(a) Investments (cont'd.)

ii) Fair Value of Financial Assets

The fair value of equity securities, exchange traded funds, unit trust fund and real estate investment trusts are determined by reference to market bid prices quoted on Bursa Malaysia Securities Berhad or Bloomberg Limited Partnership.

The fair value of debt securities, comprises of Malaysian Government Securities, Government Investment Issues and Corporate Bonds, is determined by references to market prices obtained from Bondweb, which is provided by Bond Pricing Agency Malaysia (“BPAM”).

All financial assets, except for those measured at FVTPL are subject to impairment assessment (see notes 3 (c) Impairment of financial assets).

(b) Cash and Cash equivalents

Cash and Cash equivalents consist of cash at bank and deposits held at call with financial institution with maturities of three months or less.

(c) Impairment of financial assets

Financial instruments that are not measured at FVTPL

The Funds recognise loss allowances for expected credit losses (“ECL”) on financial assets measured at amortised costs.

Notes to the Financial Information (cont'd.)

3. Summary of significant accounting policies (cont'd.)

(c) Impairment of financial assets (cont'd.)

The Funds assess on a forward looking basis the ECL associated with financial assets measured at amortised cost. The Funds recognise a loss allowance for ECL at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Funds measure loss allowances at an amount equal to lifetime ECL, except for financial instruments on which credit risk has not increased significantly since their initial recognition.

12-month ECL represent the portion of lifetime ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

The Funds assess at each reporting date whether a financial asset or group of financial assets is impaired.

(d) Financial liabilities

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

Financial liabilities are recognised in the statements of assets and liabilities when, and only when, the Funds become a party to the contractual provisions of the financial instrument. Financial liabilities are classified as other financial liabilities at fair value through profit or loss or at amortised cost, as appropriate.

Notes to the Financial Information (cont'd.)

3. Summary of significant accounting policies (cont'd.)

(d) Financial liabilities (cont'd.)

(j) Foreign currency transactions

Secara kolektif seperti pasaran lain, pada tahun 2022 kami berdepan dengan rintangan dan cabaran termasuk ketidaktentuan ekonomi global, namun pasukan pelaburan dan pengurus dana kami yang cemerlang telah memanfaatkan strategi cergas yang mendorong kami mencapai prestasi yang lebih baik berbanding purata pasaran lain.

Penyata Ketua Pegawai Eksekutif (samb.)

Bagi tempoh di bawah ulasan, saya berbesar hati untuk berkongsi bahawa walaupun berdepan gelora pasaran, kami berdiri teguh dalam melaksanakan komitmen jangka panjang kami yang memberi tumpuan kepada nilai-nilai sejati dan pulangan konsisten untuk semua pemegang polisi kami. MCIS Life sentiasa mengutamakan inovasi dan mengamalkan prinsip Alam Sekitar, Sosial dan Tadbir Urus (ESG) dalam setiap urusan.

Sebagai penginsurans yang dipercayai dan diyakini dengan pengalaman pasaran selama lebih enam dekad, kami melihat pelaburan yang lestari dan bertanggungjawab sebagai pemacu utama yang mampu menjana penciptaan nilai jangka panjang, melangkaui norma biasa yang meletakkan ESG sebagai keperluan perniagaan beretika.

Untuk membantu pemahaman anda dengan lebih baik dan pantas bagaimana sektor ekonomi utama dan petunjuk prestasi telah membentuk pasaran pada 2022 dan sekaligus mempengaruhi prestasi dana kami, teruskan membaca ulasan ringkas di bawah:

Sorotan Prestasi Pasaran

Dari sudut perspektif, 2022 merupakan tahun yang amat mencabar bagi ekonomi global di mana beberapa pergolakan makroekonomi seperti kadar inflasi yang tinggi, dasar monetari yang diperketatkan, perang Rusia-Ukraine dan krisis rantai bekalan global telah menyebabkan pertumbuhan global mengalami kelembapan sehingga menolak tahap ekonomi global hampir jatuh ke dalam kemelesetan.

Amerika Syarikat (A.S.), rantau Eropah dan China kesemuanya mengalami tempoh kelemahan yang ketara, dan kesan limpahan yang terhasil memburukkan lagi masalah lain yang dihadapi oleh pasaran baru muncul dan ekonomi membangun.

Di A.S., inflasi melonjak ke paras tertinggi 40 tahun kepada 9.06% pada Jun 2022 yang menyebabkan Rizab Persekutuan memulakan siri kenaikan kadar faedah yang belum pernah dilakukan sebelum ini, daripada julat kadar sasaran 0% - 0.25% kepada 4.25% - 4.50% menjelang akhir Disember 2022. Ia menandakan kadar tertinggi dalam 15 tahun dan ekonomi mula kehilangan momentum. Namun begitu, kadar pengangguran adalah lebih baik pada 3.60% setakat Disember 2022 berbanding 4.20% pada Disember 2021.

Penyata Ketua Pegawai Eksekutif (samb.)

Dolar A.S. mengukuh berbanding hampir setiap mata wang utama lain ke paras yang tidak dilihat selama beberapa dekad apabila Rizab Persekutuan menaikkan kadar faedah secara agresif dalam usaha untuk memerangi inflasi dan secara keseluruhannya, indeks dolar yang lebih lebar yang digunakan untuk mengukur nilai dolar berbanding kumpulan mata wang yang digunakan secara meluas dalam perdagangan antarabangsa, meningkat lebih 12.00% pada 2022.

Perang Rusia-Ukraine telah menyebabkan berlakunya kekurangan bekalan tenaga dan menolak harga tenaga menjadi lebih tinggi sekaligus mengakibatkan ekonomi zon Euro dan United Kingdom terjejas dan menyaksikan kemerosotan dalam keyakinan dan perbelanjaan pengguna. Di samping itu, inflasi juga turut meningkat secara mendadak di seluruh Eropah dan menyebabkan bank pusat mengambil kedudukan dasar yang lebih agresif. Kadar dasar utama Bank Pusat Eropah dan Bank England masing-masing memulakan tahun pada -0.50% dan +0.25% namun menjelang akhir tahun masing-masing telah meningkat kepada 2.00% dan 3.50% dengan kedua-duanya bersedia untuk bergerak lebih tinggi di masa hadapan walaupun berhadapan dengan risiko kemelesetan.

Walaupun pertumbuhan pada 2022 agak lemah terutamanya di China, kemerosotan yang berlaku telah mencecah antara tahap terburuk dalam tempoh hampir setengah abad apabila suku keempat terjejas teruk akibat sekatan COVID-19 yang ketat dan kejatuhan pasaran hartanah telah memberikan tekanan tambahan kepada penggubal dasar untuk melancarkan lebih banyak pakej rangsangan pada tahun ini.

Bagi tahun 2022, KDNK China berkembang 3.00%, tersasar daripada jangkaan rasmi “sekitar 5.50%” dan jauh merudum berbanding pertumbuhan 8.40% pada 2021. Mengecualikan perkembangan 2.20% selepas awal pandemik yang melanda pada 2020, ini adalah prestasi terburuk sejak 1976, tahun terakhir Revolusi Kebudayaan selama sedekad yang memusnahkan ekonomi China.

Selepas pencerobohan ganas Rusia ke atas Ukraine menyebabkan harga komoditi global melonjak pada awal tahun 2022, harga tenaga telah merosot pada separuh kedua tahun dan ia menyukarkan lagikekangan bekalan, digabungkan pula dengan permintaan pengguna yang lebih rendah. Keadaan ini membolehkan inflasi bergerak merentasi kategori barang teras dan menyaksikan harga minyak mentah Brent meningkat 10.45% kepada USD85.91/tong pada akhir Disember 2022.

Penyata Ketua Pegawai Eksekutif (samb.)

Di dalam negara, prestasi ekonomi Malaysia melonjak kepada 8.70% berbanding 3.10% pada tahun 2021, pertumbuhan tahunan tertinggi yang dicatatkan dalam tempoh 22 tahun (2000: 8.90%). Sementara itu, nilai eksport kita meningkat 25.00% tahun-ke-tahun (t-k-t), mencapai rekod RM1.55 trillion pada 2022 bersandarkan peningkatan penghantaran ke semua rakan dagangan utama manakala inflasi utama naik kepada 3.30% (2021: 2.50%) sementara inflasi teras pula mencatatkan purata lebih tinggi pada 3.00% (2021: 0.70%).

Melangkah ke hadapan, Bank Dunia telah mengunjurkan pertumbuhan ekonomi global akan perlahan dengan ketara sebanyak 1.70% pada tahun 2023 kepada kadar ketiga terlemah selama hampir tiga dekad, hanya ditewaskan oleh oleh kemelesetan global 2009 dan 2020. Ia mencerminkan pengetatan dasar yang bertujuan untuk membendung inflasi yang sangat tinggi, keadaan kewangan yang semakin teruk, dan gangguan berterusan daripada perang Rusia-Ukraine yang masih berlaku.

Bagi Malaysia pada 2023, Bank Dunia menjangka pertumbuhan ekonomi akan berkembang pada kadar yang lebih sederhana sebanyak 4.00% dengan persekitaran luaran yang mencabar. Permintaan dalam negara akan terus memacu pertumbuhan, disokong oleh pemulihan berterusan dalam pasaran buruh dan projek pelaburan berbilang tahun yang bakal menjadi kenyataan. Sektor perkhidmatan dan pembuatan juga akan terus menyokong pertumbuhan manakala kelembapan eksport berikutan permintaan global yang lebih lemah akan sebahagiannya diimbangi oleh aktiviti pelancongan yang lebih tinggi. Keseimbangan risiko kekal condong ke arah bawah, terutamanya daripada pertumbuhan global yang lebih lemah, keadaan kewangan yang lebih ketat, peningkatan semula konflik geopolitik dan gangguan rantai bekalan yang semakin buruk.

Prestasi Pasaran Kewangan

Kesan inflasi dan kenaikan kadar faedah di kebanyakan negara menolak saham ke pasaran merudum dan melengkungkan pasaran bon pada tahun 2022. Pelabur menyaksikan salah satu tahun paling bergelora dengan kehilangan saham dunia bernilai bertrillion dolar, pasaran bon mengalami pergolakan dan pemotongan pantas mata wang dan komoditi.

Penyata Ketua Pegawai Eksekutif (samb.)

Di A.S., Indeks S&P 500 menjana pulangan negatif sebanyak 19.44% t-k-t dan Indeks Dow Jones Industrial menurun kepada 8.78% t-k-t, yang terburuk sejak 2008 dan menamatkan rekod kenaikan tiga tahun berturut-turut. Inflasi yang tinggi dan kenaikan kadar yang agresif daripada Rizab Persekutuan menjelaskan pertumbuhan dan saham teknologi serta memberi kesan ke atas sentimen pelabur sepanjang tahun. Ketegangan geopolitik dan data ekonomi yang tidak kukuh juga menyebabkan pasaran tidak menentu.

Momentum yang sama juga melanda Eropah dengan Indeks Stoxx 600 pan-Eropah - yang merangkumi kira-kira 90% daripada permodalan pasaran Eropah di 17 negara - menutup hari dagangan terakhir 2022 dengan merekodkan penurunan sebanyak 12.76%, yang menjadikannya prestasi pasaran terburuk sejak penurunan tahunan 13.24% pada 2018. Pasaran terbesar Eropah, Indeks DAX Jerman, mengakhiri tahun lebih rendah pada 12.35% t-k-t manakala Indeks CAC 40 Perancis kehilangan 9.50% t-k-t.

Pasaran tempatan kita, seiring dengan bursa Asia lain kecuali Indeks Straits Times Singapura (STI), mengakhiri tahun dalam julat negatif apabila Indeks FBMKLCI kehilangan 4.60% t-k-t kepada 1,495.49 mata berbanding dengan kenaikan STI sebanyak 4.09%. Jumlah dan nilai dagangan Bursa yang lebih rendah mencerminkan pengurangan minat runcit di mana pelabur mungkin telah memilih untuk keluar daripada pasaran berikutan pembetulan mendadak dalam harga saham pembuat sarung tangan dan syarikat teknologi. Bagi 2022, pelabur runcit tempatan dan asing adalah pembeli bersih dengan jumlah belian bersih masing-masing RM2 bilion dan RM4.4 bilion manakala institusi tempatan pula menjadi penjual bersih dengan nilai RM6.4 bilion.

Bagi kategori pendapatan tetap, 2022 juga merupakan pasaran yang bergelora apabila Bank Negara Malaysia (BNM) menaikkan Kadar Dasar Semalam daripada 1.75% kepada 2.75% atau 100 titik asas pada tahun di bawah ulasan. Sekuriti Kerajaan Malaysia (MGS) tidak menunjukkan prestasi yang baik secara keseluruhannya, dengan kadar pulangan meningkat secara purata ~51 titik asas sepanjang lengkuk, mencerminkan dasar monetari defensif yang diambil oleh hampir semua ekonomi utama dunia dalam usaha untuk membendung tekanan inflasi. Pulangan MGS 10 tahun melonjak ke paras tertinggi 14-tahun kepada 4.57% dan menyusut semula kepada 4.04% menjelang akhir tahun manakala Indeks Markit iBoxx ALBI Malaysia Total Return pula merekodkan pulangan 1.21% bagi tempoh yang sama.

Ulasan Prestasi Dana Hayat MCIS

Untuk tempoh dua belas bulan berakhir 31 Disember 2022, Dana Dividend mencatat kenaikan 0.11% manakala Dana Equity juga meningkat 1.09% dengan kedua-duanya berjaya mengatasi Indeks FBMKLCI yang merekodkan kejatuhan 4.60%. Berita positif juga datangnya dari Dana Jati, walaupun mencatatkan pulangan negatif sebanyak 1.61% namun masih berjaya mengatasi penanda aras Indeks FBM EMAS Shariah sebanyak 919 titik asas, yang merekodkan kerugian lebih besar pada kadar 10.80%. Ketiga-tiga dana aset tempatan ini berjaya mengatasi prestasi penanda aras masing-masing bagi tempoh tiga tahun dan lima tahun di bawah ulasan di mana kecemerlangan ini telah dimangkin terutamanya oleh pendedahan rendah kepada saham kurang berprestasi.

Seperti dimaklumkan pada awal laporan, MGS tidak mencatatkan prestasi yang baik secara keseluruhannya pada 2022 di mana pulangan bergerak menaik dengan purata ~51 titik asas sepanjang lengkuk pulangan. Dalam tempoh ini, Dana Income memberikan pulangan 0.60% berbanding pulangan penanda arasnya sebanyak 1.21% manakala Dana Balanced pula merekodkan pulangan 0.61% berbanding pulangan -1.51% yang dicatatkan oleh penanda arasnya atas dasar t-k-t.

Dana Asiapac, yang melabur dalam Principal S&P Ethical Asia Pacific Dividend ETF yang disenaraikan di Singapura, mencatatkan pulangan negatif 3.79% namun mengatasi prestasi penanda aras yang merekodkan kerugian lebih besar sebanyak 13.42%. Kejayaan mengatasi prestasi penanda aras adalah hasil prestasi lebih baik oleh aset sandaran dan pegangan tunai di dalam portfolio, disemarakkan lagi oleh kejayaan mengatasi prestasi indeks penanda aras untuk tempoh tiga tahun dan lima tahun masing-masing sebanyak 671 titik asas dan 549 titik asas.

Beralih kepada Dana Global Yakin, dana perantara yang melabur dalam Dana abrdn Islamic World Equity Fund (dahulunya dikenali sebagai Dana Aberdeen Standard Islamic World Equity), mencatatkan pulangan -18.51%, tidak mengatasi prestasi Indeks MSCI AC World Islamic yang mencatatkan pulangan -15.32%. Namun begitu, dana berjaya mengatasi indeks penanda aras untuk tempoh tiga tahun dan lima tahun masing-masing sebanyak 138 titik asas dan 75 titik asas.

Penyata Ketua Pegawai Eksekutif (samb.)

Dana Titan yang melabur dalam MyETF Dow Jones U.S. Titans 50, merekodkan pulangan negatif 17.08% t-k-t bagi tempoh berakhir 31 Disember 2022, mengatasai prestasi indeks penanda aras, Indeks Dow Jones Islamic Market U.S. Titans 50, yang mencatatkan pulangan negatif lebih lebar sebanyak 26.95% t-k-t. Dana juga berjaya mengatasai prestasi penanda aras bagi tempoh tiga tahun sebanyak 63 titik asas.

Unjuran untuk 2023

Melangkah ke tahun 2023 yang dilihat secara amnya sebagai tahun di mana ekonomi global dijangka akan mengalami kelembapan, pasukan penyelidikan dan pembangunan kami akan berusaha gigih dan berganding bahu dengan pengurusan pelaburan kami untuk mengenalpasti peluang baharu dengan memberi tumpuan kepada pengendalian turun-naik pasaran bagi mendapatkan pulangan optimum.

Tahun ini, Rizab Persekutuan dijangka akan terus menaikkan kadar faedahnya pada separuh pertama 2023 untuk menangani inflasi namun untuk jangka panjang, kami menjangka trend pemulihan akan berlaku bermula dari separuh kedua tahun dan seterusnya apabila inflasi mula bergerak lebih rendah. Sejarah analisis menyarankan bahawa kadar faedah lebih rendah akan membawa kesan positif kepada pasaran ekuiti.

Bagi segmen pasaran pendapatan tetap tempatan, BNM dijangka akan mengekalkan kedudukan monetari sebagai sedikit agresif pada 2023 di mana negara beroperasi dalam fasa endemik. Faktor risiko luaran seperti konflik Rusia-Ukraine, tekanan A.S.-China dan turun-naik harga minyak mentah akan terus memberi kesan ke atas pasaran tempatan.

Pada pendapat kami, segmen bon korporat masih menyediakan pulangan yang menarik dan sejajar dengan potensi ini, kami akan sentiasa berusaha untuk mencari belian atas penurunan bon korporat kerana kami kekal optimis mengenai prospek pertumbuhan bagi dana-dana berkaitan-pelaburan kami. MCIS Life berharap agar dapat terus berkongsi kejayaan yang lebih besar pada tahun-tahun akan datang bersama anda.

Yang Benar,

Prasheem Seebraan

Laporan Prestasi Dana

Dana Balanced

Untuk tempoh dua belas bulan, Dana Balanced mengatasi prestasi yang dicatatkan oleh penanda arasnya sebanyak 212 titik asas apabila dana menghasilkan pulangan tahunan sebanyak 0.61% berbanding pulangan -1.51% yang direkodkan oleh penanda aras berasaskan tahun-ke-tahun (iaitu indeks yang dibentuk oleh 50% wajaran kepada FBMKLCI dan 50% kepada Indeks Markit iBoxx ALBI Malaysia TRI).

Pasaran saham Malaysia mencatatkan prestasi negatif sejajar dengan kelembapan sentimen pasaran global akibat gelora makroekonomi. Indeks FBMKLCI mengakhiri tahun 2022 pada 1,495.49 mata, turun -4.60% atas dasar tahunan. Untuk pendapatan tetap, MGS secara keseluruhannya tidak mencatatkan prestasi yang baik, dengan pulangan bergerak menaik dengan purata ~51 titik asas sepanjang lengkungan. Ia mencerminkan dasar kewangan agresif di seluruh ekonomi utama dunia dalam usaha untuk mengekang tekanan inflasi.

Melangkah ke hadapan, kami menjangka ekonomi global akan perlahan pada tahun 2023, selepas menunjukkan pemulihan yang kukuh pada 2022. Rizab Persekutuan A.S. dijangka akan menaikkan kadar faedah pada separuh pertama 2023 untuk menangani inflasi. Bagaimanapun, untuk tempoh lebih panjang, kami menjangka akan berlaku pemulihan pada separuh kedua tahun apabila inflasi mula bergerak turun. Sejarah analisis menyarankan bahawa kadar faedah lebih rendah akibat inflasi yang rendah akan memberi kesan positif kepada pasaran ekuiti. Untuk pendapatan tetap, BNM dijangka mengekalkan kedudukan kewangan sedikit agresif pada 2023 apabila negara memasuki fasa endemik. Faktor risiko luaran dan pergerakan harga minyak mentah akan terus memberi wajaran ke atas pasaran tempatan, namun kami percaya pasaran bon korporat masih menyediakan pulangan yang menarik.

Dana Dividend

Untuk tempoh dua belas bulan di bawah ulasan, Dana Dividend naik 0.11% mengakhiri Disember 2022. Dana mengatasi prestasi penanda aras sebanyak 471 titik asas di mana Indeks FBMKLCI mencatatkan pulangan negatif 4.60%. Dana juga berjaya mengatasi penanda aras untuk tempoh lebih panjang iaitu tiga tahun dan lima tahun, masing-masing sebanyak 236 titik asas dan 301 titik asas. Kejayaan mengatasi prestasi penanda aras adalah disebabkan oleh kurangnya pendedahan kepada saham berprestasi rendah.

Pasaran saham Malaysia mencatatkan prestasi negatif sejajar dengan kelembapan sentimen pasaran global akibat gelora makroekonomi. Melangkah ke hadapan, kami menjangka ekonomi global akan perlakan pada tahun 2023. Rizab Persekutuan A.S. dijangka akan menaikkan kadar faedah pada separuh pertama 2023 untuk menangani inflasi. Bagaimanapun, untuk tempoh lebih panjang, kami menjangka akan berlaku pemulihan pada separuh kedua tahun apabila inflasi mula bergerak turun. Sejarah analisis menyarankan bahawa kadar faedah lebih rendah akibat inflasi yang rendah akan memberi kesan positif kepada pasaran ekuiti.

Dana Dividend akan terus memberi tumpuan kepada saham-saham dengan pulangan dividen tinggi dan syarikat-syarikat dengan asas kewangan yang kukuh bagi memastikan pendapatan dividen dan peningkatan modal jangka panjang untuk dana.

Dana Income

Untuk tempoh dua belas bulan berakhir 31hb Disember 2022, Dana Income tidak mengatasi prestasi penanda arasnya sebanyak -61 titik asas apabila dana menghasilkan pulangan tahunan 0.60% berbanding pulangan penanda aras sebanyak 1.21% berdasarkan tahun-ke-tahun.

Pada 2022, MGS secara keseluruhannya tidak mencatatkan prestasi yang baik, di mana pulangan bergerak menaik dengan purata ~51 titik asas sepanjang lengkungan. Ia mencerminkan dasar kewangan agresif di seluruh ekonomi utama dunia dalam usaha untuk mengekang tekanan inflasi.

BNM dijangka mengekalkan kedudukan kewangan sedikit agresif pada 2023 apabila negara memasuki fasa endemik. Faktor risiko luaran seperti konflik Rusian-Ukraine, tekanan A.S.-China dan pergerakan harga minyak mentah akan terus memberi wajaran ke atas pasaran tempatan, namun kami percaya pasaran bon korporat masih menyediakan pulangan menarik. Oleh itu, kami akan terus mencari pembelian pada penurunan bon korporat jika berpeluang.

Dana Asiapac, dana perantara yang melabur dalam Principal S&P Ethical Asia Pacific Dividend ETF yang disenaraikan di Singapura, menyasarkan untuk menyediakan hasil pelaburan yang seiring dengan prestasi indeks penanda aras, Indeks S&P Ethical Pan Asia Select Dividend Opportunities.

Untuk tempoh dua belas bulan berakhir 31hb Disember 2022, dana mencatatkan pulangan negatif 3.79% mengatasi pulangan penanda aras yang mencatatkan kerugian lebih tinggi 13.42%. Kejayaan mengatasi penanda aras adalah disebabkan oleh prestasi aset sandaran yang lebih baik dan pegangan tunai di dalam portfolio. 2022 merupakan tahun yang negatif untuk pasaran ekuiti global termasuk Asia Pasifik.
