Investment-Linked Fund Performance Report July 2026

General Advice Warning

The information contained in this material is general information and intended for the use of professional advisers, researchers, and trustees. It does not take into account the objectives, financial situation or needs of any person. These factors should be considered before acting on this information.

MCIS receives remuneration such as fees, charges, or premiums for the products. Details of these payments including how they are calculated and when and how they are payable can be found in the relevant sales illustrations, or other disclosure document for each product.

MCIS Life has received, on behalf of the funds, soft commissions from our investment fund bankers/brokers, in the form of research materials and investment-related publications which are incidental to the investment management of the funds. This report, among others, incorporates consolidated content for the benefit of MCIS Life's policyholders.

Past performance is not a reliable indicator of future performance

The information in this presentation should not be considered a personal recommendation on any of the securities or stocks mentioned.

EXECUTIVE SUMMARY

The Malaysian equity market recorded as one of the strongest performers in the region in July, reflecting improving market sentiment and stronger buying interest. The FBMKLCI rose approximately 3.7% during the month, ending at 1,724.90 points on 31 July 2026. The average daily trading value on Bursa Malaysia came in at RM2.4bil in July 2026, a 20.6% MoM decline. Meanwhile, the average daily trading volume on Bursa Malaysia also fell by 12% MoM to 3.1bil shares in July 2026.

Malaysia Government Securities ("MGS") yields were increasing higher during the month, reflecting the yield movement in the US. Brent crude oil prices increased to USD90.12/barrel as at end-Jul'26 (end-Jun'26: USD72.92/barrel), driven by the renewed geopolitical tensions in the Middle East region. Meanwhile, ringgit remained largely unchanged against dollar to RM4.086/USD in Jul'26 (Jun'26: RM4.084/USD).

On the local economic data, inflation eased to +1.9% YoY in Jun'26, attributable to slower growth of +2.8% YoY in transport prices and +1.4% YoY in housing, water, electricity, gas & other fuels. Malaysia exports growth continued to expand by double digits at +45.4% YoY in Jun'26.

Moving forward, globally, the escalation of the US-Iran conflict in late February 2026 has increased volatility in global markets, including Malaysia. The FBMKLCI faced mild selling pressure as investors turned cautious amid rising geopolitical risks. However, the impact on Malaysia remains limited due to minimal direct economic exposure to the region. Locally, we continue to be positive on Malaysia's equity market in 2026, supported by strong domestic fundamentals, improving company earnings, and lower external risks, which could lead to higher market valuations. The strengthening in ringgit will also support the domestic market recovery after a volatility recorded in 2025. Any near-term market weakness could be viewed as an opportunity to accumulate equities.

In Malaysia, BNM is anticipated to maintain the monetary policy in 2026, given the better-than-expected GDP growth and moderate inflation data. The external risk factors such as global trade disruption as well as Middle East and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.

Based on the table below, on monthly basis, only MCIS Life Income Fund, MCIS Life Global Yakin Fund and MCIS Life Titan Fund outperformed their benchmark indices.

Policyholders are encouraged to focus on regular premiums given the current risk and volatile period of the economic and market condition. Risk-averse investors should focus on income funds due to its less volatile as compared to equity-related funds.

MCIS Life Balanced Fund Monthly Report (July 2026)

Investment Objective

To achieve steady stream of income and capital appreciation over the long term (5 to 10 years of period) by investing in a mixture of local fixed income securities and local equities.

Investment Strategy

The Fund invests primarily in local fixed income securities (MYR assets), including government bonds and corporate debt securities, and local equities listed on Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides fixed income securities and equities, the Fund would also invest in Collective Investment Scheme ("CIS") and money market instruments.

Risks

The Fund is considered medium risk given the mixed exposure of equity securities, fixed income, and cash. The following factors can potentially affect the value of the Fund, consumer sentiment, financial performance of the underlying companies, industry and economic development, social and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades of defaults can affect the value of fixed income securities.

The target market is conservative investors who want insurance protection with an element of investment exposure in both local equity and bond markets.

Fund Performance

For the month ending July 2026, the fund underperformed the benchmark by 42bps MoM (month-on-month). The underperformance was mainly driven by a higher exposure of underperforming securities in the portfolio compared to the benchmark.

Notice: Past performance is not indicative of future performance, and the performance of the Fund is not guaranteed.

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12 months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/ contributions paid for the product.

* The benchmark index is a composite of 50% FBMKLCI Index and 50% of Markit iBoxx ALBI Malaysia TR Index (Since June '16). Prior to that, the index used was HSBC Malaysia All Bond Index for the fixed income portion. Benchmark return is calculated on re-based basis. The source is from the subscription of Markit Indices and Bloomberg.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

MCIS Life Equity Fund

Monthly Report (July 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in local equities.

Investment Strategy

The Fund invests in broad selection of equities listed on Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in equity-related Collective Investment Scheme ("CIS") and money market instruments.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of potential upside of investment exposure in the local equity market.

Fund Performance

For the month ended July 2026, the fund underperformed the benchmark by 94bps MoM (month-on-month). The underperformance was mainly driven by a higher exposure of underperforming securities in the portfolio compared to the benchmark.

MCIS Life Income Fund

Monthly Report (July 2026)

Investment Objective

To achieve a steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in local fixed income securities.

Investment Strategy

The Fund invests primarily in local fixed income securities (MYR assets), including government bonds and corporate debt securities. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides fixed income securities, the Fund would also invest in money market instruments.

Risks

The Fund is considered lower risk given the exposure to cash and fixed income securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades or defaults can affect the value of fixed income securities.

The target market is conservative investors who want insurance protection with an element of investment exposure in the bond market.

Fund Performance

For the month ended July 2026, the fund outperformed the benchmark by 21bps MoM (month-on-month). The outperformance was due to the outperforming of fixed income securities compared to the benchmark index.

MCIS Life Jati Fund Monthly Report (July 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in local Shariah-compliant equities. However, the Fund is not a Shariah-compliant product.

Investment Strategy

The Fund invests primarily in a broad selection of Shariah-compliant equities listed on the Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in Shariah-compliant equity-related Collective Investment Scheme ("CIS") and Shariah-compliant money market instruments.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, reclassification of Shariah status, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of investment exposure in local equity market that complied with Shariah principles.

Fund Performance

For the month ending July 2026, the fund underperformed the benchmark by 39bps MoM (month-on-month). The underperformance was mainly driven by a higher exposure of underperforming securities in the portfolio compared to the benchmark.

MCIS Life Dividend Fund Monthly Report (July 2026)

Investment Objective

To achieve a steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in local equities with attractive dividend yield*.

Investment Strategy

The Fund invests primarily in a broad selection of equities listed on Bursa Malaysia that offer consistent dividend payments with attractive yield*. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in equity-related Collective Investment Scheme ("CIS") and money market instruments.

*Potentially higher than market yield

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of potential upside of investment exposure in the local equity market with a high yielding income stream.

Fund Performance

For the month ended July 2026, the fund underperformed the benchmark by 62bps MoM (month-on-month). The underperformance was mainly driven by a higher exposure of underperforming securities in the portfolio compared to the benchmark.

MCIS Life AsiaPac Fund Monthly Report (July 2026)

Investment Objective

To achieve steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in Principal Islamic Asia Pacific Dynamic Equity Fund ("PIAPDE").

Investment Strategy

This is a feeder fund structure that invests primarily in the PIAPDE. PIAPDE aims to achieve long-term capital appreciation and income while complying with Shariah investment criteria, through investments in the emerging and developed markets of Asia Pacific ex Japan region. PIAPDE's asset can be invested in Shariah-compliant equities, Shariah-compliant warrants, Islamic options, participation in Islamic Collective Investment Scheme which are permitted by Securities Commission Malaysia as well as Sukuk and Islamic Deposits. Besides PIAPDE, the Fund would also invest in Islamic money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, higher price volatility in the emerging markets, and reclassification of Shariah status.

The target market is investor who seek capital appreciation over a long-term investment horizon with a well-diversified portfolio of Shariah-compliant equities in Asia Pacific ex Japan region.

Fund Performance

For the month ended July 2026, the fund underperformed the benchmark by 786bps MoM (month-on-month). On the long term, the fund had outperformed the benchmark since inception.

MCIS Life Global Yakin Fund Monthly Report (July 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in abrdn Islamic World Equity Fund ("AIWEF"). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in AIWEF (formerly known as Aberdeen Standard Islamic World Equity Fund). AIWEF invests in an international portfolio of Shariah-compliant equities and Shariah-compliant equity related securities of companies with good growth potential. The equities selection will be based on a "bottom-up" approach focused primarily on selecting high quality companies trading at attractive valuations relative to their peers using rigorous business analysis and detailed security valuation analysis. Besides AIWEF, the Fund would also invest in Shariah-compliant money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, reclassification of Shariah status, and the financial performance of the underlying companies.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon and who are willing to accept a high level of risk.

Fund Performance

For the month ended July 2026, the fund outperformed the benchmark by 231bps MoM (month-on-month).

MCIS Life Titan Fund Monthly Report (July 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in Eq8 Dow Jones US Titans 50 ETF ("ETF"). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in ETF. The ETF is a passive index fund that tracks the Dow Jones Islamic Market U.S. Titans 50 Index ("Index"). The Index is designed as a performance benchmark of 50 largest companies by float-adjusted market capitalisation listed on relevant exchanges which have passed rules-based screens for Shariah compliance. Besides ETF, the Fund would also invest in Shariah-compliant money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, reclassification of Shariah status, and the financial performance of the underlying companies.

The Fund is suitable for investors who are seeking diversification and investment opportunities in Shariah-compliant equities in the U.S. market and seeking liquid financial instruments with an index tracking feature.

Fund Performance

For the month ended July 2026, the fund outperformed the benchmark by 134bps MoM (month-on-month).

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12 months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/contributions paid for the product.

* Index Dow Jones Islamic Market U.S. Titans 50 Index sourced from Bloomberg.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

MCIS Life Emerging Asia Fund

Monthly Report (July 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years) by investing in the Principal China-India-Indonesia Opportunities Fund ("PCIIO"). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in PCIIO. PCIIO primarily invests in equities and equity-related securities of undervalued listed companies that are domiciled in, or have significant operations in, the China, India and Indonesia markets, which offer attractive valuations and medium-term to long-term growth potential. Besides PCIIO, the Fund would also invest in money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, and higher price volatility in the relevant emerging markets.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon with equity investment focuses on China, India and Indonesia.

Fund Performance

For the month ended July 2026, the fund underperformed the benchmark by 1010bps MoM (month-on-month).

Equity Market Review and Outlook

Market Review

The Malaysian equity market recorded as one of the strongest performers in the region in July, reflecting improving market sentiment and stronger buying interest. The FBMKLCI rose approximately 3.7% during the month, ending at 1,724.90 points on 31 July 2026. The average daily trading value on Bursa Malaysia came in at RM2.4bil in July 2026, a 20.6% MoM decline. Meanwhile, the average daily trading volume on Bursa Malaysia also fell by 12% MoM to 3.1bil shares in July 2026.

In July 2026, local institutions turned net sellers, recording net outflows of RM0.3bil and ending a three-month buying streak. Local retail investors remained net buyers, though net inflows narrowed significantly to a marginal RM19mil. On the other hand, foreign investors turned into net buyers in July 2026, ending two consecutive months of net selling, albeit with a modest net inflow of RM0.3bil.

Meanwhile, the global equity markets posted mix performances across regions in July 2026. The volatility came in amid renewed geopolitical tensions, elevated oil prices and uncertainty over the outlook for global monetary policy. In the US, Dow Jones Industrial Average Index posted marginal gain of 0.3% MoM and the S&P 500 Index slipped to a slight loss of -0.1% MoM. European equity markets delivered modest gain in July with the MSCI Europe Index gained 0.9% MoM. On the other hand, Asia-Pacific markets experienced substantially greater volatility in July with the MSCI Asia APEX 50 ex-Japan slowed by -5.6% MoM.

Market Outlook & Strategy

Traditionally, FBMKLCI Index's performance was mixed in August, with an average of -2.1% and +1.3% for MoM returns over the past 10 years and 45 years, respectively. We expect the market to be supported by its attractive valuations at current levels of 14.9x PER, as it is now below its 16-year historical average of 16.7x and P/B of 1.63x, below the 16-year historical average of 1.82x.

Technically, the FBMKLCI recovered from the 1,657 low and regained the 1,700 level, suggesting that buying interest is becoming more widespread. The index formed higher highs, indicating improving short-term momentum. The outlook remains cautiously bullish, although the index faces resistance around 1,735–1,750. Immediate support is seen at 1,700, while stronger support lies around 1,670–1,680. A decisive breakout above 1,750 would strengthen the bullish trend, while a break below 1,700 could trigger further consolidation or correction. Until then, the index is likely to remain range-bound with an upward bias, with 1,700 serving as the key near-term level to monitor.

Globally, the escalation of the US-Iran conflict in late February 2026 has increased volatility in global markets, including Malaysia. The FBMKLCI faced mild selling pressure as investors turned cautious amid rising geopolitical risks. However, the impact on Malaysia remains limited due to minimal direct economic exposure to the region. Locally, we continue to be positive on Malaysia's equity market in 2026, supported by strong domestic fundamentals, improving company earnings, and lower external risks, which could lead to higher market valuations. The strengthening in ringgit will also support the domestic market recovery after a volatility recorded in 2025. Any near-term market weakness could be viewed as an opportunity to accumulate equities.

Fixed Income Review and Outlook

Market Review

Malaysia Government Securities (“MGS”) yields were increasing higher during the month, reflecting the yield movement in the US. Brent crude oil prices increased to USD90.12/barrel as at end-Jul'26 (end-Jun'26: USD72.92/barrel), driven by the renewed geopolitical tensions in the Middle East region. Meanwhile, ringgit remained largely unchanged against dollar to RM4.086/USD in Jul'26 (Jun'26: RM4.084/USD).

On the local economic data, Inflation eased to +1.9% YoY in Jun'26 (May'26: +2.0% YoY), attributable to slower growth of +2.8% YoY in Transport prices (May'26: +3.8% YoY) and +1.4% YoY in Housing, Water, Electricity, Gas & Other Fuels (May'26: +1.2% YoY). Malaysia Exports growth continued to expand by double digits at +45.4% YoY in Jun'26 (May'26: +44.7% YoY), driven by the robust Manufacturing Exports as well as surge in Mining Exports. Additionally, Exports to US market remained high growth at +108.6% YoY (May'26: +97.8% YoY), while Exports to ASEAN market strengthened to +46.5% YoY (May'26: +35.5% YoY). Meantime, Malaysia Imports growth surged to +43.9% YoY in Jun'26 (May'26: +14.4% YoY), supported by the strong growth in Intermediate Goods Imports and rebound in Capital Goods Imports. All in all, the trade surplus narrowed to +RM14.9bil in Jun'26 (May'26: +RM40.4bil).

BNM international reserves declined slightly to USD132.1bil as at end-Jul'26 (end-Jun'26: USD132.6bil). The reserves position is sufficient to finance 4.7 months of imports of goods and services and is 0.9 times of the total short-term external debt.

The auctions unveiled in July'26 is as follow;

Issue	Government Auctions			
	Issue Date	Auction Amount + PP (RM million)	Bid-cover (times)	Avg Yield (%)
10-yr Reopening of MGS 7/35 3.476%	03-Jul-26	5,000.00	1.87	3.61
3.5-yr Reopening of MGII 10/29	15-Jul-26	5,000.00	2.26	3.28
15-yr Reopening of MGS 1/41	22-Jul-26	5,000.00	2.06	3.90

Source: Bank Negara Malaysia

Chart 1: MGS Yield Curve

Source: BPAM

Chart 2: US Treasury Yield Curve

Source: Bloomberg

US 10-year Treasury yield jumped higher to 4.74% as at end-Jul'26 (end-Jun'26: 4.47%), highlighting the rising inflation concerns and hawkish Fed rate outlook in the US.

Market Outlook & Strategy

In Malaysia, BNM is anticipated to maintain the monetary policy in 2026, given the better-than-expected GDP growth and moderate inflation data. The external risk factors such as global trade disruption as well as Middle East and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.
