Investment-Linked Fund Performance Report January 2026

General Advice Warning

The information contained in this material is general information and intended for the use of professional advisers, researchers, and trustees. It does not take into account the objectives, financial situation or needs of any person. These factors should be considered before acting on this information.

MCIS receives remuneration such as fees, charges, or premiums for the products. Details of these payments including how they are calculated and when and how they are payable can be found in the relevant sales illustrations, or other disclosure document for each product.

MCIS Life has received on behalf of the funds, soft commissions from our investment fund bankers/brokers, in the form of research materials and investment-related publications which are incidental to the investment management of the funds. This report, among others, incorporates consolidated content for the benefit of MCIS Life's policyholders.

Past performance is not a reliable indicator of future performance

The information in this presentation should not be considered a personal recommendation on any of the securities or stocks mentioned.

EXECUTIVE SUMMARY

The FBMKLCI Index began 2026 on a firm footing, advancing for four straight weeks to end January at 1,740.88 points (3.6% MoM), underpinned by policy optimism, improving macroeconomic indicators, renewed foreign inflows, a firmer ringgit and higher market liquidity. The average daily trading value on Bursa Malaysia climbed 42.3% MoM to RM3.2bil in January, the strongest start to a year since January '21. Meanwhile, the average daily trading volume recorded an increase of 7.0% MoM to RM3.0bil in the month.

Malaysia Government Securities (“MGS”) remained largely unchanged in the month. Brent crude oil prices jumped substantially to USD70.69/barrel as at end-Jan'26 (end-Dec'25: USD60.85/barrel), weighted by geopolitical conflicts in Iran and Venezuela. Meanwhile, Ringgit strengthened sharply against dollar to RM3.945/USD in Jan'26 (end-Dec'25: RM4.060/USD), mainly driven by the return of foreign investors given the brighter economic fundamentals in the country.

On the local economic data, Malaysia saw strong Gross Domestic Product (“GDP”) growth at a +5.7% YoY in 4Q2025 (3Q2025: +5.2% YoY), averaging the full year GDP growth at +4.9% (2024: +5.1%). The GDP growth was mainly fuelled by robust domestic demand.

Moving forward, we continue to remain positive on Malaysia’s equity market in 2026, supported by strong domestic fundamentals, improving company earnings, and lower external risks, which could lead to higher market valuations. The strengthening in ringgit will also support the domestic market recovery after a volatility recorded in 2025.

For fixed income, in Malaysia, BNM is anticipated to maintain the monetary policy in 1H2026, given the better-than-expected GDP growth and moderate inflation data. The external risk factors such as global trade disruption, Middle East conflict and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.

Based on the table below, on monthly basis, MCIS Life Balanced Fund, MCIS Life Equity Fund, MCIS Life Income Fund and MCIS Life Jati Fund had outperformed their benchmarks.

Policyholders are encouraged to focus on regular premiums given the current risk and volatile period of the economic and market condition. Risk-averse investors should focus on income funds due to its less volatile as compared to equity-related funds.

MCIS Life Balanced Fund Monthly Report (January 2026)

Investment Objective

To achieve steady stream of income and capital appreciation over the long term (5 to 10 years of period) by investing in a mixture of local fixed income securities and local equities.

Investment Strategy

The Fund invests primarily in local fixed income securities (MYR assets), including government bonds and corporate debt securities, and local equities listed on Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides fixed income securities and equities, the Fund would also invest in Collective Investment Scheme ("CIS") and money market instruments.

Risks

The Fund is considered medium risk given the mixed exposure of equity securities, fixed income, and cash. The following factors can potentially affect the value of the Fund, consumer sentiment, financial performance of the underlying companies, industry and economic development, social and political factors, and the liquidity of the underlying assets. Additionally, levels of interest rates, and credit downgrades of defaults can affect the value of fixed income securities.

The target market is conservative investors who want insurance protection with an element of investment exposure in both local equity and bond markets.

Fund Performance

For the month ending January 2026, the fund outperformed the benchmark by 30bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

Notice: Past performance is not indicative of future performance, and the performance of the Fund is not guaranteed.

The Fund returns are calculated by MCIS Life and based on the value of the NAV and for periods greater than 12-months are annualised numbers. Actual returns of the Fund are on a net basis (gross of tax and net of fees) and based on the performance of the Fund, and not the returns earned on the actual premiums/contributions paid for the product.

* The benchmark index is a composite of 50% FBMKLCI Index and 50% of Markit iBoxx ALBI Malaysia TR Index (Since June '16). Prior to that, the index used was HSBC Malaysia All Bond Index for the fixed income portion. Benchmark return is calculated on re-based basis. The source is from the subscription of Markit Indices.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

MCIS Life Equity Fund Monthly Report (January 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in local equities.

Investment Strategy

The Fund invests in broad selection of equities listed on Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in equity-related Collective Investment Scheme ("CIS") and money market instruments.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of potential upside of investment exposure in the local equity market.

Fund Performance

For the month ended January 2026, the fund outperformed the benchmark by 28bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

MCIS Life Jati Fund

Monthly Report (January 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in local Shariah-compliant equities. However, the Fund is not a Shariah-compliant product.

Investment Strategy

The Fund invests primarily in a broad selection of Shariah-compliant equities listed on the Bursa Malaysia. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in Shariah-compliant equity-related Collective Investment Scheme ("CIS") and Shariah-compliant money market instruments.

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, reclassification of Shariah status, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of investment exposure in local equity market that complied with Shariah principles.

Fund Performance

For the month ending January 2026, the fund outperformed the benchmark by 26bps MoM (month-on-month). The outperformance was mainly driven by a higher exposure of outperforming securities in the portfolio compared to the benchmark.

MCIS Life Dividend Fund Monthly Report (January 2026)

Investment Objective

To achieve a steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in local equities with attractive dividend yield*.

Investment Strategy

The Fund invests primarily in a broad selection of equities listed on Bursa Malaysia that offer consistent dividend payments with attractive yield*. The investment analysis is using the top-down and bottom-up approaches. A top-down approach is based on market and economic conditions, meanwhile the bottom-up approach is based on the fundamentals of a company. Besides equities, the Fund would also invest in equity-related Collective Investment Scheme ("CIS") and money market instruments.

*Potentially higher than market yield

Risks

The Fund is considered high risk given the exposure to equity securities. The following factors can potentially affect the value of the Fund, consumer sentiment, the financial performance of the underlying companies, the performance of the industry and economy, the share market in general, social, and political factors, and the liquidity of the underlying assets.

The target market is clients who want insurance protection with an element of potential upside of investment exposure in the local equity market with a high yielding income stream.

Fund Performance

For the month ended January 2026, the fund underperformed the benchmark by 2bps MoM (month-on-month). The underperformance was mainly driven by a higher exposure of underperforming securities in the portfolio compared to the benchmark.

MCIS Life AsiaPac Fund**

Monthly Report (January 2026)

Investment Objective

To achieve steady stream of income and capital appreciation over the long-term (5 to 10 years of period) by investing in Principal Islamic Asia Pacific Dynamic Equity Fund ("PIAPDE").

Investment Strategy

This is a feeder fund structure that invests primarily in the PIAPDE. PIAPDE aims to achieve long-term capital appreciation and income while complying with Shariah investment criteria, through investments in the emerging and developed markets of Asia Pacific ex Japan region. PIAPDE's asset can be invested in Shariah-compliant equities, Shariah-compliant warrants, Islamic options, participation in Islamic Collective Investment Scheme which are permitted by Securities Commission Malaysia as well as Sukuk and Islamic Deposits. Besides PIAPDE, the Fund would also invest in Islamic money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, higher price volatility in the emerging markets, and reclassification of Shariah status.

The target market is investor who seek capital appreciation over a long-term investment horizon with a well-diversified portfolio of Shariah-compliant equities in Asia Pacific ex Japan region.

Fund Performance

For the month ended January 2026, the fund underperformed the benchmark by 288bps MoM (month-on-month). The fund has outperformed the benchmark since its inception.

Statement On the Changes in Investment Objectives and Strategies

Effective from April 2025, there were changes to the MCIS Life AsiaPac Fund, mainly as follows: -

- Underlying Fund*: from Principal S&P Asia Pacific Ethical Dividend Exchange Traded Fund to **Principal Islamic Asia Pacific Dynamic Equity Fund**
- Benchmark index*: from S&P Ethical Pan Asia Select Dividend Opportunities Index to **MSCI AC Asia ex-Japan Islamic Index**

*Please refer to the Fund Fact Sheet for further information. (available on our corporate website at www.mcis.my)

MCIS Life Global Yakin Fund Monthly Report (January 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in abrdn Islamic World Equity Fund (“AIWEF”). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in AIWEF (formerly known as Aberdeen Standard Islamic World Equity Fund). AIWEF invests in an international portfolio of Shariah-compliant equities and Shariah-compliant equity related securities of companies with good growth potential. The equities selection will be based on a "bottom-up" approach focused primarily on selecting high quality companies trading at attractive valuations relative to their peers using rigorous business analysis and detailed security valuation analysis. Besides AIWEF, the Fund would also invest in Shariah-compliant money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, illiquid and inefficient securities in the Emerging Markets, reclassification of Shariah status, and the financial performance of the underlying companies.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon and who are willing to accept a high level of risk.

Fund Performance

For the month ended January 2026, the fund underperformed the benchmark by 471bps MoM (month-on-month) mainly due to the underperforming of the underlying fund and the weakening of USD.

MCIS Life Titan Fund Monthly Report (January 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years of period) by investing in Eq8 Dow Jones US Titans 50 ETF (Formerly known as MyETF Dow Jones U.S. Titans 50) ("ETF"). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in ETF. The ETF is a passive index fund that tracks the Dow Jones Islamic Market U.S. Titans 50 Index ("Index"). The Index is designed as a performance benchmark of 50 largest companies by float-adjusted market capitalisation listed on relevant exchanges which have passed rules-based screens for Shariah compliance. Besides ETF, the Fund would also invest in Shariah-compliant money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, reclassification of Shariah status, and the financial performance of the underlying companies.

The Fund is suitable for investors who are seeking diversification and investment opportunities in Shariah-compliant equities in the U.S. market and seeking liquid financial instruments with an index tracking feature.

Fund Performance

For the month ended January 2026, the fund underperformed the benchmark by 412bps MoM (month-on-month) mainly due to the underperforming of the underlying fund and the weakening of USD.

The NAV per unit of the Fund is the total market value of assets in the Fund divided by the total number of units of the Fund. Transaction costs, taxes and applicable fees are provided for in the net asset value.

MCIS Life Emerging Asia Fund Monthly Report (January 2026)

Investment Objective

To achieve capital appreciation over the long-term (5 to 10 years) by investing in the Principal China-India-Indonesia Opportunities Fund ("PCIIO"). However, the Fund is not a Shariah-compliant product.

Investment Strategy

This is a feeder fund structure that invests primarily in PCIIO. PCIIO primarily invests in equities and equity-related securities of undervalued listed companies that are domiciled in, or have significant operations in, the China, India and Indonesia markets, which offer attractive valuations and medium-term to long-term growth potential. Besides PCIIO, the Fund would also invest in money market instruments.

Risks

The Fund invests solely in a single underlying fund and does not engage in individual stock selection or adopt defensive strategies during market downturns. As such, the Fund's performance is entirely dependent on the underlying fund's investment decisions and market exposure. The following factors can potentially affect the value of the Fund, economic and political developments in related countries, foreign exchange fluctuation, and higher price volatility in the relevant emerging markets.

The Fund is suitable for investors who seek capital appreciation over a long-term investment horizon with equity investment focuses on China, India and Indonesia.

Fund Performance

For the month ended January 2026, the fund underperformed the benchmark by 150bps MoM (month-on-month), mainly due to the underperformance of the underlying fund.

Equity Market Review and Outlook

Market Review

The FBMKLCI Index began 2026 on a firm footing, advancing for four straight weeks to end January at 1,740.88 points (3.6% MoM), underpinned by policy optimism, improving macroeconomic indicators, renewed foreign inflows, a firmer ringgit and higher market liquidity. The average daily trading value on Bursa Malaysia climbed 42.3% MoM to RM3.2bil in January, the strongest start to a year since January '21. Meanwhile, the average daily trading volume recorded an increase of 7.0% MoM to RM3.0bil in the month.

Local institutions maintained their buying streak in Malaysian equities for the eighth straight month, posting net buy flows of RM1.2bil in January. Meanwhile, local retail investors' net selling widened to over RM2.2bil, compared with RM411mil in December 25. On the other hand, foreign investors turned net buyers of Malaysian equities in January, with net inflows of RM1.0bil.

Global shares gained in January with emerging markets outperforming developed markets, supported by dollar weakness. In the U.S., the S&P 500 Index gained by 1.4% MoM and the Dow Jones Industrial Average Index gained by 1.7% MoM. The European equities market posted mixed performances with steady gain in January. The MSCI Europe Index registered a gain of 3.1% MoM. Meanwhile, the Asia-Pacific ex-Japan regions were mostly posted positive performances, except for Indonesia's JCI Index. The region's strong performance was partly supported by improved investor risk appetite and an ongoing rotation of assets away from the highly concentrated U.S. market. The MSCI Asia APEX 50 ex-Japan closed higher by 11.5% MoM.

Market Outlook & Strategy

Traditionally, FBMKLCI Index's performance was positive in February, with an average of 2.3% and 0.7% for both MoM returns over the past 10 years and 45 years. We expect the market to be supported by its attractive valuations at current levels of 16.4x PER, as it is now below its 15-year historical average of 16.8x and P/B of 1.63x, below the 15-year historical average of 1.83x.

On the chart, the FBMKLCI maintained its bullish reversal after breaking above the downtrend line from its August 24 peak, with index trading above most of its moving average lines. It showed resilience after being sideways in the final quarter of 2025. The MACD remained in bullish territory throughout the month, and the RSI is strongly showing overbought signal. As the sentiment is shifting in favour of the bulls, we anticipate the index to range between 1,528 points (200-day SMA) as key support and resistance at 1,771 points (recent high).

We continue to be positive on Malaysia's equity market in 2026, supported by strong domestic fundamentals, improving company earnings, and lower external risks, which could lead to higher market valuations. The strengthening in ringgit will also support the domestic market recovery after a volatility recorded in 2025.

Fixed Income Review and Outlook

Market Review

Malaysia Government Securities (“MGS”) remained largely unchanged in the month. Brent crude oil prices jumped substantially to USD70.69/barrel as at end-Jan'26 (end-Dec'25: USD60.85/barrel), weighted by geopolitical conflicts in Iran and Venezuela. Meanwhile, Ringgit strengthened sharply against dollar to RM3.945/USD in Jan'26 (end-Dec'25: RM4.060/USD), mainly driven by the return of foreign investors given the brighter economic fundamentals in the country.

On the local economic data, Malaysia saw strong Gross Domestic Product (“GDP”) growth at a +5.7% YoY in 4Q2025 (3Q2025: +5.2% YoY), averaging the full year GDP growth at +4.9% (2024: +5.1%). The GDP growth was mainly fuelled by robust domestic demand. On the other hand, inflation increased to +1.6% YoY in Dec'25 (Nov'25: +1.4% YoY), attributed to higher Alcoholic Beverages & Tobacco prices and Housing, Water, Electricity, Gas & Other Fuels prices.

Malaysia Exports growth expanded to +10.4% YoY in Dec'25 (Nov'25: +7.0% YoY), driven by stronger Manufacturing Exports despite contraction in Agriculture Exports. Additionally, Exports to US market accelerated by +48.8% YoY (Nov'25: -0.9% YoY). Meantime, Malaysia Imports growth eased slightly to +12.0% YoY in Dec'25 (Nov'25: +15.8% YoY), reflecting the contraction in Capital Goods Imports and rebound in Consumption Goods Imports. All in all, the trade surplus expanded to +RM19.3 billion in Dec'25 (Nov'25: +RM6.1 billion).

BNM international reserves improved further to USD126.9 billion as at end-Jan'26 (end-Dec'25: USD125.5 billion). The reserves position is sufficient to finance 4.8 months of imports of goods and services and is 0.9 times of the total short-term external debt.

The auctions unveiled in Jan'26 is as follow;

Government Auctions				
Issue	Issue Date	Auction Amount + PP (RM million)	Bid-cover (times)	Avg Yield (%)
5-yr Reopening of MGII 8/30 3.635%	08-Jan-26	5,000.00	2.30	3.27
15-yr New Issue of MGS (Mat on 01/41)	15-Jan-26	5,000.00	1.94	3.77
30-yr New Issue of MGII (Mat on 01/56)	30-Jan-26	5,000.00	2.07	4.04

Source: Bank Negara Malaysia

Chart 1: MGS Yield Curve

Source: BPAM

Chart 2: US Treasury Yield Curve

Source: Bloomberg

US 10-year Treasury yield increased to 4.24% as at end-Jan'26 (end-Dec'25: 4.17%), attributed to strong US economic data and high inflation above the Fed target of 2.0%.

Market Outlook & Strategy

In Malaysia, BNM is anticipated to maintain the monetary policy in 1H2026, given the better-than-expected GDP growth and moderate inflation data. The external risk factors such as global trade disruption, Middle East conflict and Russia-Ukraine geopolitical tension will continue to weigh on the local market, but we believe corporate bond space still provides attractive yields. As such, our fixed income strategy will remain defensive to shelter from the market volatilities in the near term.
