CEO's Statement (cont'd.)

Economic Backdrop

2020 was a volatile year for the global economy as the COVID-19 pandemic caused major disruptions in the first three quarters of the year. However, as we edged closer towards the last quarter of 2020, there were some signs of economic recovery buoyed by improvements in trade activity, substantial monetary and fiscal support by governments and the development of the COVID-19 vaccine.

In the United States (US), the hospitality, tourism, transport and retail sectors were hit hard but the overall balance sheet damage to corporates and households had been relatively limited despite the large lockdowns. The US' annual gross domestic product (GDP) contracted by 3.5% in 2020 as compared to a growth of 2.2% in 2019.

Globally, GDP in quarter 2 of 2020 was significantly down with economies like the US showing recoveries in both quarter 3 and quarter 4. The improvements in the second half of the year were driven by a rebound in private investment and improvements in private consumption.

Meanwhile, in Europe, the pace of recovery slowed as COVID-19 resurgences necessitated further re-tightening of containment measures. On an annual basis, the GDP growth for the Eurozone dropped by 5.1% in the year 2020 as compared to a growth of 1.3% in the year 2019. On the other hand, China's economy showed resilience as it became the first major economy to return to post-COVID-19 growth numbers. The COVID-19 pandemic which peaked in China in the 1Q20 pulled its GDP to contract by 6.8% in the same quarter before recovering in the remaining quarters of the year 2020. The republic recorded a positive growth of 6.5% in the fourth quarter of 2020 (after 3.2% and 4.9% quarterly growth in the second and third quarter of 2020), thus the year realising a full recovery back to pre-pandemic growth levels. The country's ability to contain the spread of COVID-19 led to strong domestic and external activity anchored by the recovery of the region's value chains with improvement in exports benefitting the country.

Brent crude oil prices improved to an average of USD45 per barrel during the fourth quarter (average of USD43 per barrel in the third quarter), driven mainly by higher global oil demand and positive sentiments surrounding the deployment of the COVID-19 vaccines. The ongoing production cuts by the Organization of the Petroleum Exporting Countries Plus (OPEC+) since May 2020 also supported higher crude oil prices.

CEO's Statement (cont'd.)

Locally on an annual basis, the Malaysian GDP contracted by 5.6% in 2020 as compared to a growth of 4.3% recorded in 2019. On a quarterly basis, the COVID-19 pandemic had negatively impacted our economy in the second quarter of the year after the Movement Control Order (MCO) 1.0 kicked in on 18 March 2020. This saw the GDP dropping by 17.1% in the same quarter. Meanwhile, as the government focused on more targeted movement restrictions, the re-opening of economic activity saw the GDP contraction slowing in the third and fourth quarters of the year with a contraction of 2.6% in the third quarter before a contraction of 3.4% in the last quarter of the year. Headline inflation, as measured by the annual percentage change in the Consumer Price Index (CPI) was slightly lower at -1.5% during the quarter (-1.4% in the third quarter). In the fourth quarter of 2020, gross exports grew by 5.1% (4.4% in the third quarter), driven primarily by the continued strength in manufactured exports. Gross imports registered a smaller decline of 4.5% (-6.3% in the third quarter) due primarily to a more moderate contraction in intermediate imports.

Nevertheless, fiscal support by governments of countries worldwide resulted in rising government debt. The International Monetary Fund (IMF) projected that gross government debt for the world's seven largest developed economies, or G7, would rise by 23% of the GDP in 2020. High debt makes government finances vulnerable to rising interest rates. Even though this is unlikely to be a significant problem in the next couple of years, it will matter when spare capacity is eventually exhausted and inflation begins to rise. For 2021, IMF projects that the global economy will grow by 6%, 80 basis points higher than its prior forecast, reflecting expectations of a vaccine-powered strengthening of economic activity later in the year and additional policy support in a few large economies.

For Malaysia, the growth trajectory is projected to improve from the second quarter of the year 2021 onwards. The improvements are expected to be driven by the recovery in global demand, turnaround in public and private sector expenditure amid continued support from policy measures and higher manufacturing production. The deployment of vaccines will also lift consumer sentiments. However, there exists downside risk to the outlook mainly from ongoing uncertainties surrounding the dynamics of the pandemic.

CEO's Statement (cont'd.)

Financial Market Performance

It was a year of uncertainty for global financial markets with the increasing number of COVID-19 cases reported and resultant lockdowns affecting several country's economies across the globe. However, the deployment of COVID-19 vaccines, rising fiscal stimulus, lower interest rates and broader central banks interventions had buoyed investor sentiment towards the end of the year.

In the U.S. on a year-on-year (y-o-y) basis, the Dow Jones Industrial Index rose by 7.2% while the broader index S&P 500 Index of top U.S. companies surged by 16.2% for the year 2020, hitting a series of record highs, as signing of a COVID-19 aid bill and rollout of vaccines increased expectations that the economy will quickly rebound from the pandemic, fuelling gains in the market.

On the other hand, the United Kingdom's (U.K.) FTSE 100 Index suffered its worst year since 2008 when the index lost 14.4%. The restrictions on traffic between the U.K. and other countries due to COVID-19 raised the pressure on supply chains, coupled with fresh lockdowns to prevent the new strain of the virus sweeping across southern England from spreading to the continent weighed on the capital market.

Eurozone stock market performance was mixed but in general have been the laggards in 2020 with the Bloomberg European 500 Index losing 4.1% in 2020. Germany's DAX Index gained 3.5% and France's CAC Index lost 7.1%. Meanwhile, China's Shanghai Stock Exchange grew by 14.3% supported by a string of initial public offerings (IPOs) and rally in consumer and technology stocks.

Locally, the overall performance of the Malaysian equity market was surprisingly positive where the FBMKLCI Index closed higher by 2.4% at 1,627 points. In the earlier part of 2020, concern over the COVID-19 pandemic and impact of the MCO 1.0, led to the drop of the benchmark FBMKLCI Index to as low as 1,207.80 on 19 March 2020 before recovering to pre-COVID levels towards the end of the year.

CEO's Statement (cont'd.)

During the year, retailers and local institutions have been net buyers for Bursa Malaysia. Retailers were net buyers to the tune of RM13.8 billion, larger than local institutions at RM10.4 billion. Foreign investors sold RM24.8 billion worth of equities on Bursa Malaysia.

In terms of the local bond market, Bank Negara Malaysia (BNM) implemented an aggressive monetary easing in 2020, cutting the Overnight Policy Rate (OPR) and a 100-bps Statutory Reserve Requirement (SRR) in order to stimulate the economic growth and support liquidity in the system amid the COVID-19 global pandemic. The local monetary policy was largely in line with the global monetary easing trend to combat economic challenges arising from the pandemic, where the U.S. Fed had cut its interest rate by 150-bps to a near zero level. Moving forward, BNM is expected to maintain its dovish tone in 2021, given the weaker economic prospects arising from the second wave of COVID-19 infections and the potential political unrest. The uncertainties of the US-China trade conflict would also continue to weigh on the global economy.

The Malaysian Government Securities' (MGS) performance experienced a strong rally throughout the year 2020, with the 10-Year MGS yield moving down by circa ~66bps. The bond rally was mainly driven by the strong dovish monetary policy given the worst economic slowdown since the Asian Financial Crisis of 1997-98. Subsequently, this resulted in superior performance of the Markit iBoxx ALBI Malaysia Total Return Index at 7.35% in 2020.

Fund Performance

For the twelve-month period ending 31 December 2020, our Dividend Fund gained 0.04% while the Equity Fund lost 0.36%. Both returns underperformed the FBMKLCI Index which gained 2.42%. However, both funds managed to outperform the benchmark for three-year and five-year periods under review. Meanwhile, the Jati Fund gave a positive return of 2.59% as compared to the benchmark FBMEMAS Shariah Index, which posted a higher return of 10.14%.

The underperformance was mainly due to the lower exposure of outperforming assets, especially in glove stocks. Glove stock prices soared tremendously during the year due to the high demand from healthcare providers in handling the COVID-19 cases. On a year-on-year basis, major glove manufacturers on the Bursa Malaysia namely Top Glove Berhad and Hartalega Berhad rose by 390% and 221% respectively.

CEO's Statement (cont'd.)

During the year, the MCIS Life Income Fund gave a return of 7.30% as compared to its benchmark return of 7.35% on a year-on-year basis. Meanwhile, the Balanced Fund posted a 4.85% return as compared to its benchmark return of 5.16% on a year-on-year basis.

The AsiaPac Fund, investing in the Principal S&P Ethical Asia Pacific Dividend ETF listed in Singapore, recorded a negative return of 6.65%, outperforming the benchmark return of -10.37%. The outperformance was due to better performance of the underlying asset and cash holdings in the portfolio. The fund also managed to outperform the benchmark index for the three and five-year periods by 363bps and 35bps respectively.

The MCIS Life Global Yakin Fund, a feeder fund that invests in Aberdeen Standard Islamic World Equity Fund (ASIWEF), managed by Aberdeen Standard Islamic Investments (Malaysia) Sdn Bhd, registered a positive return of 13.62%, compared to the benchmark MSCI AC World Islamic Index return of 8.92%. The fund managed to outperform the benchmark index for the one-year and three-year periods by 470bps and 239bps respectively.

The Titan Fund (investing in MyETF Dow Jones U.S. Titans 50), which focuses on Shariah-compliant equities listed in the US market, registered a positive return of 18.03%. The benchmark index, Dow Jones Islamic Market U.S. Titans 50 Index, performed strongly by 27.67% on the same period under review. The underperformance of the fund by 964bps was mainly due to lower exposure of the underlying assets and high cash holdings during the period as the fund is still at the early stage to reach its economies of scale for creation of ETF.

In 2021, a year largely seen as the basis of the post pandemic recovery period, we will adopt an investment strategy based on tactical asset allocation and a top down approach. Investment instruments will be selected depending on market and economic conditions prevalent at that point in time. Our investment team will continue to look for value in securities selection with the aim of achieving long-term objectives of each fund.

Thank you.

Fund Performance Report

Balanced Fund

For twelve-month period, Balanced Fund has underperformed its required benchmark by 31bps when the fund generated an annual return of 4.85% as compared to its benchmark return of 5.16% on year-on-year basis (eg. an index constructed with 50% weighting to the FBMKLCI and 50% to the Markit iBoxx ALBI Malaysia TR Index).

It was a volatile year for equity market in 2020. However, the local benchmark had performed positively by 2.42% y-o-y, in-line with the improvements in the global equity market with the deployment of COVID-19 vaccine. The development has buoyed investors sentiment. On fixed income space, MGS has performed strongly in overall, with the yields moving downward by average ~66bps across the curve. This was mainly driven by a series of interest rate cuts both locally and globally, to combat the economic slowdown arising from the COVID-19 pandemic.

Going forward, we expect volatility in equity market will continue this the year 2021 with positive bias. For fixed income space, BNM is expected to stay dovish tone into 2021, taking cue from the weaker economic pressure arising from the second wave of COVID-19 infections and the potential political instability in the country.

Dividend Fund

For twelve months period under review, Dividend Fund gained 0.04% ending December 2020. The fund had underperformed the benchmark by 238bps where FBMKLCI Index posted higher gain by 2.42%. The fund however, managed to outperform the benchmark on longer term of three-year and five-year periods with excess of 193bps and 24bps respectively.

The underperformance was mainly due to the lower exposure of outperforming asset, especially in glove stocks. Glove stocks prices has soared tremendously during the year due to the high demand from healthcare providers in handling COVID-19 cases. The holding of the stocks was short-lived in our portfolio as we see it as high-risk investment given the rapid price movement and not sustainable in the long run.

It was a volatile year for equity market in 2020. However, the local benchmark had performed positively by 2.42% y-o-y, in-line with the improvements in the global equity market with the deployment of COVID-19 vaccine. The development has buoyed investors sentiment.

Moving forward, Dividend Fund will continue to focus on high dividend yielding stocks and financial fundamentally sound companies that will ensure dividend income and long-term capital appreciation for the fund.

Equity Fund

Equity Fund lost 0.36% for the year ending 31 December 2020. The return had underperformed the benchmark return for yearly basis by 278bps, which FBMKLCI Index gained 2.42%. On the longer term however, the fund had outperformed the benchmark for the period of three-year and five-year periods with excess of 206bps and 100bps respectively.

The underperformance was mainly due to the lower exposure of outperforming asset, especially in glove stocks. Glove stocks prices has soared tremendously during the year due to the high demand from healthcare providers in handling COVID-19 cases. However, non-glove sectors were under pressure on concern over the negative impact of COVID-19 and slower economic growth.

It was a volatile year for equity market in 2020. However, the local benchmark had performed positively by 2.42% y-o-y on selective buying interest, in-line with the improvements in the global equity market with the deployment of COVID-19 vaccine. The development has buoyed investors sentiment.

Moving forward, investment strategy will remain centered on well-managed liquid stocks with positive growth prospects with strong earnings visibility. Stocks with strong cash flows and proactive capital management will also be considered.

Jati Fund

Jati Fund has posted a positive return of 2.59% for the year ending 31 December 2020, underperforming the benchmark FBM EMAS Shariah Index by 755bps, which posted a gain of 10.14% for the same period under review. However, the fund managed to outperform the benchmark for three-year basis by 29bps.

The underperformance was mainly due to the lower exposure of outperforming asset, especially in glove stocks. Glove stocks prices has soared tremendously during the year due to the high demand from healthcare providers in handling COVID-19 cases. However, non-glove sectors were under pressure on concern over the negative impact of COVID-19 and slower economic growth.

Jati Fund invests in Shariah approved securities listed on the Bursa Malaysia with a strategy to ensure sustainable long-term growth for the fund. Investment strategy will remain centered on well-managed liquid stocks that exhibit positive growth prospects with strong earnings visibility. Stocks with strong cash flows and proactive capital management will also be considered.

Fund Performance Report (cont'd.)

Income Fund

For twelve-month period ended 31 December 2020, Income Fund has slightly underperformed its required benchmark by 5bps when the fund generated an annual return of 7.30% as compared to its benchmark return of 7.35% on year-on-year basis. The underperformance of the fund was mainly due to overweighting position in the corporate bonds over the government bonds, where government bonds saw stronger overall performance in the year.

In 2020, MGS has performed strongly in overall, with the yields moving downward by average ~66bps across the curve. This was mainly driven by a series of interest rate cuts both locally and globally, to combat the economic slowdown arising from the COVID-19 pandemic.

Going forward, BNM is expected to stay dovish tone into 2021, taking cue from the weaker economic pressure arising from the second wave of COVID-19 infections and the potential political unrest. Meantime, the uncertainties of U.S.-China trade conflict would continue to weigh on the global economy.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial information.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial information of the Funds, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control.

Auditors' responsibilities for the audit of the financial information (cont'd.)

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial information of the Funds or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Funds to cease to continue as a going concern.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

3. Summary of significant accounting policies

(a) Investments

i) Financial assets

On initial recognition, a financial asset is classified as measured at amortised cost or fair value through profit or loss ("FVTPL").

Amortised cost

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

FVTPL

All financial assets that are not classified as measured at amortised cost, as described above, are measured at FVTPL. Any gains or losses from changes in fair value and interest are recognised in the statement of income and expenditure.

The Funds determine the classification of its financial assets at initial recognition, and the categories include financial assets at FVTPL and at amortised cost.

Notes to the Financial Information (cont'd.)

3. Summary of significant accounting policies (cont'd.)

(a) Investments

ii) Fair value of financial assets

The fair value of equity securities, exchange traded funds, unit trust fund and real estate investment trusts are determined by reference to market bid prices quoted on Bursa Malaysia Securities Berhad or Bloomberg Limited Partnership.

The fair value of debt securities, comprises of Malaysian Government Securities, Government Investment Issues and Corporate Bonds, is determined by references to market prices obtained from Bondweb, which is provided by Bond Pricing Agency Malaysia (“BPAM”).

All financial assets, except for those measured at FVTPL are subject to impairment assessment (see note 3(c) Impairment of financial assets).

(b) Cash and cash equivalents

Cash and cash equivalents consist of cash at bank and deposits with licensed financial institutions with maturities of three months or less.

(c) Impairment of financial assets

Financial instruments that are not measured at FVTPL

The Funds recognise loss allowances for expected credit losses (“ECL”) on financial assets measured at amortised costs.

Notes to the Financial Information (cont'd.)

3. Summary of significant accounting policies (cont'd.)

(c) Impairment of financial assets (cont'd.)

The Funds assess on a forward looking basis the ECL associated with financial assets measured at amortised cost. The Funds recognise a loss allowance for ECL at each reporting date.

The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The Funds measure loss allowances at an amount equal to lifetime ECL, except for financial instruments on which credit risk has not increased significantly since their initial recognition.

12-month ECL represent the portion of lifetime ECL that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

The Funds assess at each reporting date whether a financial asset or group of financial assets are impaired.

(d) Financial liabilities

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

Financial liabilities are recognised in the statements of assets and liabilities when, and only when, the Funds become a party to the contractual provisions of the financial instrument. Financial liabilities are classified as other financial liabilities at fair value through profit or loss or at amortised cost, as appropriate.

Notes to the Financial Information (cont'd.)

3. Summary of significant accounting policies (cont'd.)

(d) Financial liabilities (cont'd.)

Financial liabilities are derecognised when the obligation under the liability is extinguished. Gains and losses are recognised in the statements of income and expenditure when the liabilities are derecognised, and through the amortisation process.

(e) Unitholders' account

Unitholders' account of the Funds represent equity instruments on the statements of assets and liabilities.

- (i) Interest from investments are recognised on accrual basis that reflects the effective yield of the asset.
- (ii) Dividend income is recognised when the rights to receive the payment is established.
- (iii) Net proceeds arising from the sale of investments are set off against the weighted average cost of investments. The resulting gains or losses are taken to the statements of income and expenditure.

Deferred tax is recognised as income or an expense and included in the statements of income and expenditure for the period, except when it arises from a transaction which is recognised directly in unitholders' account, in which case the deferred tax is also charged or credited directly in unitholders' account.

(j) Foreign currency transactions

Transactions in foreign currencies are initially recorded in the functional currency rate prevailing at the dates of the transaction. Monetary assets and liabilities denominated in foreign currencies are re-translated at the functional currency rate of exchange ruling at the reporting date. All differences are taken to the statements of income and expenditure. Non-monetary items denominated in foreign currencies that are measured at historical cost are translated using the exchange rates as at the dates of initial transactions.

Latar Belakang Ekonomi

2020 adalah tahun bergelora bagi ekonomi global apabila pandemik COVID-19 telah menyebabkan gangguan besar berlaku pada tiga suku pertama. Bagaimanapun, menjelang suku terakhir tahun 2020, terdapat beberapa petanda pemulihan ekonomi yang dimungkin oleh pemulihan di dalam aktiviti dagangan, sokongan fiskal dan kewangan yang ketara oleh kerajaan dan perkembangan vaksin COVID-19.

Di Amerika Syarikat (A.S.), sektor hospitaliti, pelancongan, pengangkutan dan runcit terjejas teruk namun kesan menyeluruh ke atas kunci kira-kira korporat dan isi rumah agak terhad walaupun perintah berkurung besar-besaran telah dilakukan. Keluaran dalam negara kasar (KDNK) A.S. mengecut 3.5% pada 2020 berbanding pertumbuhan 2.2% pada 2019.

Di peringkat global, KDNK pada suku kedua 2020 mengalami kejatuhan di mana ekonomi seperti A.S. menunjukkan pemulihan pada kedua-dua suku ketiga dan suku keempat. Pemulihan pada separuh kedua tahun telah dipacu oleh lantunan dalam pelaburan swasta dan peningkatan dalam penggunaan persendirian.

Sementara itu, proses pemulihan agak perlahan di Eropah apabila COVID-19 muncul kembali dan langkah kawalan telah diperketatkan. Atas dasar tahunan, pertumbuhan KDNK untuk Eurozone turun 5.1% pada tahun 2020 berbanding pertumbuhan 1.3% pada tahun 2019. Sebaliknya, ekonomi China pula menunjukkan ketahanan apabila ia menjadi ekonomi besar pertama yang kembali mencatatkan angka pertumbuhan pasca-COVID-19. Pandemik COVID-19 yang memuncak di China pada 1Q20 telah menarik KDNK untuk mengecut 6.6% pada suku yang sama sebelum pulih pada suku-suku seterusnya bagi tahun 2020. Republik ini merekodkan pertumbuhan positif 6.5% pada suku keempat 2020 (selepas pertumbuhan sukuhan 3.2% dan 4.9% pada suku kedua dan ketiga 2020), membolehkan tahun 2020 mengalami pemulihan penuh untuk kembali ke paras pertumbuhan pra-pandemik. Kemampuan negara tersebut menekang penularan COVID-19 membawa kepada aktiviti tempatan dan luaran yang kukuh, ditunjang oleh pemulihan nilai rantaian rantau berkenaan serta peningkatan eksport yang memberi manfaat kepada negara.

Harga minyak mentah Brent juga pulih kepada purata USD45 setong pada suku keempat (purata USD43 setong pada suku ketiga), dipacu terutamanya oleh permintaan minyak global yang lebih tinggi dan sentimen positif yang dicetuskan oleh penghantaran vaksin COVID-19. Pemotongan pengeluaran yang berterusan oleh Pertubuhan Negara Pengekspor Petroleum Plus (OPEC+) sejak Mei 2020 juga menyokong harga minyak mentah lebih tinggi.

Penyata Ketua Pegawai Eksekutif (samb.)

Atas dasar tahunan dalam negara pula, KDNK Malaysia mengecut 5.6% pada 2020 berbanding pertumbuhan 4.3% yang dicatatkan pada 2019. Untuk sukuan pula, pandemik COVID-19 memberi impak negatif ke atas ekonomi negara pada suku kedua tahun selepas Perintah Kawalan Pergerakan (PKP) 1.0 mula dilaksanakan pada 18 Mac 2020. Ia menyaksikan kejatuhan KDNK sebanyak 17.1% pada suku yang sama. Sementara itu, ketika kerajaan memberi tumpuan kepada sekatan pergerakan bersasar, pembukaan semula aktiviti ekonomi menyaksikan pengecutan KDNK semakin perlahan pada suku ketiga dan keempat tahun dengan pengecutan 2.6% pada suku ketiga sebelum merekodkan penyusutan 3.5% pada suku terakhir tahun. Inflasi utama, seperti yang diukur oleh perubahan peratusan tahunan dalam Indeks Harga Pengguna (CPI) adalah sedikit rendah pada -1.5% pada suku berkenaan (-1.4% pada suku ketiga). Pada suku keempat 2020, eksport kasar berkembang 5.1% (4.4% pada suku ketiga), dipacu terutamanya oleh pengukuhan berterusan dalam eksport pengilangan. Import kasar merekodkan kejatuhan kecil 4.5% (-6.3% pada suku ketiga) disebabkan oleh pengecutan yang lebih sederhana dalam import pengantaraan.

Namun begitu, sokongan fiskal oleh kerajaan-kerajaan di seluruh dunia telah menyebabkan hutang kerajaan meningkat. Tabung Kewangan Antarabangsa (IMF) mengunjurkan bahawa hutang kasar kerajaan bagi tujuh ekonomi maju terbesar dunia, atau G7, akan naik sebanyak 23% daripada KDNK pada 2020. Hutang yang besar menjadikan kewangan kerajaan mudah terjejas kepada kenaikan kadar faedah. Walaupun ia mungkin tidak menjadi masalah besar untuk beberapa tahun akan datang, ia akan memberi kesan apabila kemampuan simpanan akhirnya habis digunakan dan inflasi mula meningkat. Untuk 2021, IMF mengunjurkan bahawa ekonomi global akan berkembang 6.0%, 50 mata asas lebih tinggi berbanding ramalan terdahulu, mencerminkan jangkaan aktiviti ekonomi akan mengukuh di masa hadapan, dikuasakan oleh vaksin dan sokongan daripada peruntukan dasar tambahan di beberapa ekonomi besar.

Untuk Malaysia, trajektori pertumbuhan dijangka akan lebih baik bermula suku kedua 2021 dan seterusnya. Peningkatan ini diramal akan dimangkin oleh pemulihan dalam permintaan global, pembaikpulihan dalam perbelanjaan sektor awam dan swasta serta sokongan berterusan daripada langkah-langkah dasar dan pengeluaran pengilangan yang lebih tinggi. Pemberian vaksin juga akan menaikkan sentimen pengguna. Bagaimanapun, terdapat risiko kejatuhan kepada unjuran ini, disebabkan terutamanya oleh ketidakpastian berlanjutan yang menyelubungi dinamik pandemik.

Penyata Ketua Pegawai Eksekutif (samb.)

Prestasi Pasaran Kewangan

Ia adalah tahun ketidakpastian bagi pasaran kewangan global dengan peningkatan kes COVID-19 yang dilaporkan dan perintah berkurung yang dilakukan telah menjelaskan ekonomi pelbagai negara di seluruh dunia. Bagaimanapun, penghantaran vaksin COVID-19, pertambahan rangsangan fiskal, kadar faedah lebih rendah dan campurtangan meluas bank-bank pusat telah memangkin sentimen pelabur menjelang akhir tahun.

Atas dasar tahun-ke-tahun ($t-k-t$) di A.S. pula, Indeks Dow Jones Industrials naik 7.2% manakala indeks lebih meluas bagi syarikat utama A.S. iaitu Indeks S&P 500 meningkat 16.2% untuk tahun 2020, mencecah beberapa rekod tertinggi apabila rang undang-undang bantuan COVID-19 ditandatangani dan penghasilan vaksin telah meningkatkan jangkaan bahawa ekonomi akan pulih daripada pandemik lebih pantas, sekaligus merangsang kenaikan di pasaran.

Bagaimanapun, Indeks FTSE 100 United Kingdom (U.K.) mengalami tahun paling buruk sejak 2008 apabila indeks kehilangan 14.4%. Sekatan perjalanan di antara U.K. dan negara-negara lain akibat COVID-19 telah menambah tekanan ke atas rantaian bekalan, digabungkan pula dengan perintah berkurung terkini yang diambil bagi mencegah tekanan baharu virus yang menular di selatan England daripada merebak ke benua Eropah telah menjelaskan pasaran modal.

Prestasi pasaran saham Eurozone agak bercampur-campur tetapi secara umumnya agak ketinggalan pada 2020 di mana Indeks Bloomberg European 500 jatuh 4.1% pada 2020. Indeks DAX Jerman naik 3.5% dan Indeks CAC Perancis pula berkurang 7.1%. Sementara itu, Bursa Saham Shanghai berkembang 14.3% disokong oleh beberapa tawaran awam permulaan (IPO) serta kenaikan dalam saham pengguna dan teknologi.

Dalam negara pula, prestasi menyeluruh pasaran ekuiti Malaysia agak mengejutkan apabila ia merekodkan nilai positif di mana FBMKLCI ditutup lebih tinggi sebanyak 2.4% pada 1,627 mata. Pada awal tahun 2020, kebimbangan tentang pandemik COVID-19 dan kesan akibat PKP 1.0 telah menyebabkan penanda aras Indeks FBMKLCI jatuh serendah 1,207.80 pada 19 Mac 2020 sebelum pulih ke paras pra-COVID menjelang akhir tahun.

Pada tahun 2020, pelabur runcit dan institusi tempatan adalah pembeli bersih untuk Bursa Malaysia. Pelabur runcit adalah pembeli bersih dengan nilai RM13.8 bilion, lebih besar

Penyata Ketua Pegawai Eksekutif (samb.)

berbanding RM10.4 bilion daripada institusi tempatan. Pelabur asing menjual ekuiti bernilai RM24.8 bilion di Bursa Malaysia.

Untuk pasaran bon tempatan, Bank Negara Malaysia (BNM) melaksanakan pelonggaran moniteri agresif pada 2020, memotong Kadar Dasar Semalam (OPR) dan Keperluan Rizab Berkunun (SRR) sebanyak 100bps dalam usaha untuk merangsang pertumbuhan ekonomi dan menyokong kecairan di dalam sistem ketika berdepan pandemik global COVID-19. Dasar moniteri tempatan pada umumnya adalah seiring dengan trend pelonggaran moniteri global untuk menangani cabaran ekonomi yang timbul daripada pandemik ini, di mana Persekutuan A.S telah memotong kadar faedahnya sebanyak 150bps sehingga menghampiri paras sifar. Melangkah ke hadapan, BNM dijangka akan mengekalkan nada defensif pada 2021, bersandarkan prospek ekonomi yang lebih lemah akibat gelombang kedua jangkitan COVID-19 dan potensi pergolakan politik. Ketidakpastian konflik dagangan A.S-China juga turut memberi kesan ke atas ekonomi global.

Prestasi Sekuriti Kerajaan Malaysia (MGS) mengalami lonjakan kukuh sepanjang tahun 2020, di mana pulangan MGS 10-tahun bergerak ke bawah sekitar -66bps. Lonjakan bon ini sebahagian besarnya telah dimungkin oleh dasar moniteri defensif memandangkan negara mengalami keperlahanan ekonomi paling buruk sejak Krisis Kewangan Asia 1997-98. Seterusnya, ia menghasilkan prestasi cemerlang 7.35% bagi Indeks Markit iBoxx ALBI Malaysia Total Return pada 2020.

Prestasi Dana

Untuk tempoh dua belas bulan berakhir 31 Disember 2020, Dana Dividend kami naik 0.04% manakala Dana Equity jatuh 0.36%. Pulangan kedua-duanya tidak mengatasi Indeks FBMKLCI yang menokok 2.42%. Bagaimanapun, kedua-dua dana berjaya mengatasi penanda aras untuk tempoh di bawah ulasan tiga tahun dan lima tahun. Sementara itu, Dana Jati telah mencatat pulangan positif 2.59% berbanding penanda aras Indeks FBMEMAS Shariah, yang merekodkan pulangan lebih tinggi sebanyak 10.14%.

Prestasi yang lebih rendah ini sebahagian besarnya disebabkan oleh pendedahan lebih rendah kepada aset cemerlang, terutamanya saham sarung tangan. Harga saham sarung tangan melonjak pada tahun 2020 hasil permintaan yang tinggi daripada penyedia penjagaan kesihatan semasa mengendalikan kes-kes COVID-19. Atas dasar tahun-ke-tahun, pengeluar sarung tangan utama di Bursa Malaysia seperti Top Glove Berhad dan Hartalega Berhad masing-masing meningkat 390% dan 221%.

Penyata Ketua Pegawai Eksekutif (samb.)

Pada tahun di bawah ulasan, Dana MCIS Life Income menjana pulangan 7.30% berbanding pulangan penanda aras 7.35% atas dasar tahun-ke-tahun. Manakala Dana Balanced pula merekodkan pulangan 4.85% berbanding 5.16% oleh penanda aras atas dasar tahun-ke-tahun.

Dana AsiaPac, yang melabur dalam Principal S&P Ethical Asia Pacific Dividend ETF yang disenaraikan di Singapura, mencatatkan pulangan negatif 6.65%, mengatasi prestasi pulangan penanda aras pada -10.37%. Kejayaan mengatasi prestasi penanda aras adalah hasil prestasi lebih baik oleh aset sandaran dan pegangan tunai di dalam portfolio. Dana juga berjaya mengatasi indeks penanda aras bagi tempoh tiga dan lima tahun, masing-masing pada 363bps dan 35bps.

Dana MCIS Life Global Yakin, dana perantara yang melabur dalam Dana Aberdeen Standard Islamic World Equity (ASIWEF), diuruskan oleh Aberdeen Standard Islamic Investments (Malaysia) Sdn Bhd, mencatatkan pulangan positif 13.62%, berbanding pulangan 8.92% oleh penanda aras Indeks MSCI AC World Islamic. Dana berjaya mengatasi prestasi indeks penanda aras bagi tempoh satu tahun dan tiga tahun masing-masing pada 470bps dan 239bps.

Dana Titan (melabur di dalam MyETF Dow Jones U.S. Titans 50), yang memberi tumpuan kepada ekuiti patuh Shariah yang disenaraikan di pasaran A.S., mencatatkan pulangan positif 18.03%. Indeks penanda aras, Indeks Dow Jones Islamic Market U.S. Titans 50, merekodkan prestasi kukuh 27.67% bagi tempoh sama di bawah ulasan. Prestasi dana yang kurang memberangsangkan dengan ketinggalan 964bps adalah disebabkan oleh pendekahan aset sandaran yang lebih rendah dan pegangan tunai yang tinggi semasa tempoh ulasan memandangkan dana masih di peringkat awal untuk mencapai skala ekonomi bagi pembelian ETF.

Bagi 2021, tahun yang dilihat sebagai asas bagi tempoh pemulihan pasca pandemik, kami akan melaksanakan strategi pelaburan yang berdasarkan peruntukan aset taktikal dan pendekatan atas-ke-bawah. Instrumen pelaburan yang dipilih bergantung kepada keadaan pasaran dan ekonomi semasa pada masa tersebut. Pasukan pelaburan kami akan terus berusaha mencari nilai terbaik dalam pemilihan sekuriti dengan matlamat untuk mencapai objektif jangka panjang setiap dana.

Terima kasih.

Laporan Prestasi Dana

Dana Balanced

Untuk tempoh dua belas bulan, Dana Balanced tidak mengatasi prestasi yang dicatatkan oleh penanda arasnya sebanyak 31bps apabila dana menghasilkan pulangan tahunan sebanyak 4.85% berbanding pulangan 5.16% yang direkodkan oleh penanda aras (iaitu indeks yang ditakrif dengan 50% wajaran kepada FBMKLCI dan 50% kepada Indeks Markit iBoxx ALBI Malaysia TRI) berasaskan tahun-ke-tahun.

Ia adalah tahun yang bergelora untuk 2020. Bagaimanapun, penanda aras tempatan menjana prestasi positif sebanyak 2.4%, sejajar dengan pemulihan di pasaran ekuiti global selepas vaksin COVID-19 mula dihantar. Perkembangan ini telah memangkin sentimen pelabur. Bagi segmen pendapatan tetap pula, MGS menunjukkan prestasi yang kukuh secara keseluruhannya, dengan kadar hasil menurun pada purata -66bps hampir di kesemua lengkungan. Ia telah dipacu oleh rangkaian pemotongan kadar faedah tempatan dan global, untuk menangani keperlahanan ekonomi akibat pandemik COVID-19.

Melangkah ke hadapan, kami menjangka turun naik dalam pasaran ekuiti akan berterusan pada tahun 2021 ini dengan kelebihan positif. Untuk segmen pendapatan tetap, BNM dijangka mengekalkan kedudukan defensif pada 2021, mengambil petunjuk daripada tekanan ekonomi yang lebih lemah akibat gelombang kedua jangkitan COVID-19 dan potensi pergolakan politik di dalam negara.

Dana Dividend

Untuk tempoh dua belas bulan di bawah ulasan, Dana Dividend naik 0.04% bagi tempoh berakhir Disember 2020. Dana tidak mengatasi pulangan penanda aras sebanyak 238bps di mana Indeks FBMKLCI mencatat kenaikan 2.42%. Walaubagaimanapun, dana berjaya mengatasi penanda aras untuk tempoh jangka panjang tiga tahun dan lima tahun, masing-masing dengan lebihan 193bps dan 24bps.

Prestasi dana yang lebih rendah ini sebahagian besarnya disebabkan oleh kekurangan pendedahan bagi aset berprestasi tinggi, terutamanya saham sarung tangan. Harga saham sarung tangan melonjak naik sepanjang tahun berikutan permintaan yang tinggi daripada penyedia penjagaan kesihatan bagi mengendalikan kes COVID-19. Pegangan saham tersebut agak singkat kerana kami melihatnya sebagai pelaburan berisiko tinggi berdasarkan pergerakan harga yang pantas dan tidak bertahan dalam jangka penjang.

Ia adalah tahun yang bergelora bagi pasaran ekuiti pada 2020. Bagaimanapun, penanda aras mencatat prestasi positif sebanyak 2.4%, sejajar dengan pemulihan di pasaran ekuiti global selepas vaksin COVID-19 mula dihantar. Perkembangan ini telah memangkin sentimen pelabur.

Melangkah ke hadapan, Dana Dividend akan terus memberi tumpuan kepada saham-saham dengan pulangan dividen tinggi dan syarikat-syarikat dengan asas kewangan yang kukuh untuk memastikan pendapatan dividen dan peningkatan modal jangka panjang untuk dana.

Dana Equity

Dana Equity kehilangan 0.36% bagi tahun berakhir 31 Disember 2020. Dana tidak mengatasi pulangan penanda aras atas dasar tahunan sebanyak 278bps, di mana Indeks FBMKLCI mencatat kenaikan 2.42%. Untuk tempoh jangka panjang, dana berjaya mengatasi penanda aras untuk tempoh tiga tahun dan lima tahun, masing-masing dengan lebihan 206bps dan 100bps.

Prestasi dana yang lebih rendah ini sebahagian besarnya disebabkan oleh kekurangan pendedahan bagi aset berprestasi tinggi, terutamanya saham sarung tangan. Harga saham sarung tangan melonjak naik sepanjang tahun berikutan permintaan yang tinggi daripada penyedia penjagaan kesihatan bagi mengendalikan kes COVID-19. Bagaimanapun, sektor selain sarung tangan berada di bawah tekanan akibat kebimbangan mengenai impak negatif COVID-19 dan pertumbuhan ekonomi yang lebih perlakan.

Ia adalah tahun yang bergelora bagi pasaran ekuiti pada 2020. Bagaimanapun, penanda aras mencatat prestasi positif sebanyak 2.42%, sejarah dengan pemulihan di pasaran ekuiti global selepas vaksin COVID-19 mula dihantar. Perkembangan ini telah memangkin sentimen pelabur.

Melangkah ke hadapan, strategi pelaburan akan kekal memberi tumpuan kepada saham-saham cair yang diuruskan dengan baik serta menunjukkan prospek pertumbuhan positif dengan potensi perolehan yang kukuh. Saham dengan aliran tunai yang kukuh dan pengurusan modal yang proaktif juga akan dipertimbangkan.

Laporan Prestasi Dana (samb.)

Dana Jati

Dana Jati mencatatkan pulangan positif 2.59% bagi tahun berakhir 31 Disember 2020, tidak mengatasi penanda aras Indeks FBM EMAS Shariah sebanyak 755bps, yang mencatatkan kenaikan 10.14% bagi tempoh yang sama di bawah ulasan. Bagaimanapun, dana berjaya mengatasi penanda aras sebanyak 29bps bagi tempoh tiga tahun.

Prestasi dana yang lebih rendah ini sebahagian besarnya disebabkan oleh kekurangan pendedahan bagi aset berprestasi tinggi, terutamanya saham sarung tangan. Harga saham sarung tangan melonjak naik sepanjang tahun berikutan permintaan yang tinggi daripada penyedia penjagaan kesihatan bagi mengendalikan kes COVID-19. Bagaimanapun, sektor selain sarung tangan berada di bawah tekanan akibat kebimbangan mengenai impak negatif COVID-19 dan pertumbuhan ekonomi yang lebih perlakan.

Dana Jati melabur dalam sekuriti patuh Shariah yang disenaraikan di Bursa Malaysia dengan strategi untuk memastikan pertumbuhan jangka panjang yang mampan untuk dana. Strategi pelaburan akan kekal memberi tumpuan kepada saham-saham cair yang diuruskan dengan baik yang menunjukkan prospek pertumbuhan positif dengan potensi perolehan yang kukuh. Saham dengan aliran tunai yang kukuh dan pengurusan modal yang proaktif juga akan dipertimbangkan.

Dana Income

Untuk tempoh dua belas bulan berakhir 31 Disember 2020, Dana Income tidak mengatasi prestasi penanda arasnya sebanyak 5bps apabila dana menjana pulangan tahunan 7.30% berbanding pulangan penanda aras pada 7.35% berdasarkan tahun-ke-tahun. Prestasi dana yang lebih rendah adalah disebabkan oleh kedudukan wajaran tinggi dalam bon korporat berbanding bon kerajaan, di mana bon kerajaan mencatatkan prestasi lebih kukuh secara keseluruhan bagi tahun ini.

Pada 2020, MGS menunjukkan prestasi yang kukuh secara keseluruhannya, dengan kadar hasil menurun pada purata -66bps hampir di kesemua lengkungan. Ia telah dipacu oleh rangkaian pemotongan kadar faedah tempatan dan global, untuk menangani keperlahanan ekonomi akibat pandemik COVID-19.

Melangkah ke hadapan, BNM dijangka mengekalkan kedudukan defensif pada 2021, mengambil petunjuk daripada tekanan ekonomi yang lebih lemah akibat penyebaran virus COVID-19 dan potensi pergolakan politik. Sementara itu, ketidakpastian konflik dagangan AS-China akan terus memberi kesan ke atas ekonomi global.
